# PREFACE TO THE FIRST EDITION.

THIS is the second Volume of Local Rules and Orders applying exclusively to Bombay*; and it contains Rules and Orders made under (*C*) Bombay Regulations, (*D*) Local Acts of the Governor General in Council, (*E*) Acts of the Local Council and, (*F*) Regulations made under the Statute 33 Vict., Chapter 3.

2. All these Rules and Orders have been for the most part collected from the *Bombay Government Gazette* and the *Sind Official Gazette*, and are arranged in the chronological order of the Enactments under the authority of which they were made. A list of Rules and Bye-laws of the several Municipal and Local Boards has been prepared from such materials as were furnished by the Presidents of the several Boards and inserted in the List of Local Rules and Orders prefixed to the Volume.

3. This Volume, as the first, is intended to be a Supplement to the Bombay Code published by the Legislative Department of the Government of India, and the Rules and Orders herein contained have the force of law, as made under the authority of some Enactment of the Legislature and therefore deriving such force from that Enactment.

4. The Volume has been prepared from the following materials:—

(1) A pamphlet corrected up to the 31st December 1885 and entituled "Rules and Notifications in force in the Bombay Presidency issued under Regulations and Acts applicable exclusively to the Presidency of Bombay."

(2) Notifications *in extenso* referred to in the above pamphlet and the Notifications issued since the pamphlet was published.

---

* *i. e.*, the territories under the administration of the Governor of Bombay in Council.

5. Several Notifications which ought to have been, but were not, included in the pamphlet, have been inserted in this Volume, and every attempt has been made to bring out a correct edition of Local Rules and Orders.

6. The following sets of Rules and Orders are excluded from this Volume :—

(1) Rules framed by the High Court under Bombay Regulation II of 1827 and the Bombay Civil Courts Act XIV of 1869, and those made by the Judicial Commissioner in Sind under the latter Act, the proper place for them being the High Court Civil Circulars and the Manual of Civil Circulars, Sind, respectively.

(2) Rules and Orders made by the Judicial Commissioner in Sind under Bombay Act XII of 1866 (*Sind Courts*), the proper place for these Rules and Orders being a Compilation issued under the authority of the Judicial Commissioner, Sind.

(3) Rules and Orders made under Enactments relating to Merchant Shipping, it being the intention of the Government of India in the Legislative Department to compile a separate collection of such Rules and Orders.

(4) Such Rules and Orders as are published separately in Departmental Manuals.

(5) Rules and Orders under Sections 55, 61, 63 and 75 of the Dekkhan Agriculturists' Relief Act, as they will be collected by the Registration Department in a separate publication.

(6) Such Rules and Orders as are of too little general importance for publication in the Collection.

7. All the Rules and Orders, excluded as above, are noted for ready reference in the List prefixed to the Volume.

8. Rules and Orders of a temporary nature, and Orders conferring powers on officials and others personally by name, are omitted.

9. In reprinting Notifications in this Volume matter superseded has been omitted, explanatory notes (referring to superseding Notifications) being inserted. In case of minor amendments or corrections, they have been made in the Notifications themselves with explanatory footnotes. Notifications under repealed Acts kept alive by repealing Enactments are inserted under the latter Acts with appropriate footnotes.

10. A short alphabetical index is printed at the close of the Volume.

11. The Volume has been corrected up to the 30th June 1897.

*31st January 1898.*

(1) Now Act IX of 1887.

RULES FOR THE MANAGEMENT BY THE COLLECTOR OF IMMOVEABLE PROPERTY OF WHICH HE TAKES POSSESSION UNDER SECTION 22 OR 29 OF THE ACT, AND FOR CARRYING OUT THE PROVISIONS OF THE ACT IN RESPECT OF SUCH PROPERTY.

*Notn. No. 892, Judicial, dated 4th February 1885, B. G. G., 1885, Pt. I, p. 176.*

In exercise of the powers conferred by Sections 29 and 75 of the Dekkhan Agriculturists' Relief Act, 1879, the Governor in Council is pleased to make the following rules for the management by the Collector of immoveable property of which he takes possession under Section 22 or Section 29 of that Act, and generally for carrying out the provisions of that Act in respect of such property :—

1. When a Court directs the Collector to take possession of any immoveable property of a judgment-debtor or insolvent, it shall transmit with its order copies of all documents, orders or proceedings which it may think necessary to make the Collector aware of essential facts concerning the position of the judgment-debtor or insolvent, and the nature and extent of the property to be managed by him.

It shall also at any time furnish the Collector with copies of any documents, orders, or proceedings other than those transmitted which the Collector for the purpose aforesaid desires to see.

2. The aforesaid copies shall be prepared and sent to the Collector free of all costs to the parties, being made by the Court's establishment.

3. On receipt of the Court's order, the Collector may either himself proceed to execute it, or may refer it, for disposal, subject to his supervision and control, to any of his subordinates not lower in rank than a Mahálkari.

4. The Collector or other officer, to whom he so refers the Court's order, shall appoint a day for hearing any representations which the parties may desire to make, and shall cause a written notice to be served on each of them of the day so fixed.

On the appointed day, or as soon thereafter as may be, the Collector or other officer aforesaid shall, after such inquiry as he deems fit, determine whether any portion of the property to which the Court's order relates is required for the support of the judgment-debtor or of the insolvent, and the support of the members of his family dependent upon him.

The decision of any officer other than the Collector under this rule shall be subject to confirmation by the Collector

5. Possession of the property, or of so much of it as is not, in the opinion of the Collector, required for the support of the persons aforesaid, shall then be taken by the Collector, or by the officer aforesaid on behalf of the Collector, and the fact of possession having been so taken shall be published by written notice to the parties, and by proclamation on or near the property in such manner as the Collector or other officer aforesaid deems suitable.

6. If the fact of the judgment-debtor or insolvent being entitled to possession be disputed, or if any objection be raised to the Collector's taking possession of the property or of any portion of it, the Collector shall refer the

parties concerned to the Court, and pending such reference shall stay proceedings in respect of so much of the property as is in dispute.

7. If after possession of the property has been taken under Rule 6, any order in writing is made by the Collector under Section 73A of the Act, directing that any other immoveable property not so taken shall be deemed to be reserved for the support of the judgment-debtor or insolvent, and the members of his family dependent on him, such order shall be published in the same manner as the fact of possession having been taken.

8. The Collector, or other officer aforesaid, may from time to time require by written notice the attendance of the parties in order to ascertain their wishes, or to obtain information which he may consider necessary to enable him to provide satisfactorily for the execution of the Court's order; and if any party fail to attend in pursuance of such notice, the Collector or other officer aforesaid may decide the matter in his absence, and he shall not be entitled to be heard afterwards with respect thereto.

9. If the property of which possession has been taken by or on behalf of the Collector is in the occupation of a tenant paying rent for a share of the produce to the judgment-debtor or insolvent, the Collector or other officer aforesaid shall issue a written notice to such tenant, requiring him to pay the rent or share to him for so long as his tenure subsists.

If there be no tenant in possession, or on the expiration of the tenure if the land is in the occupation of a tenant, the Collector or other officer aforesaid may let, for a term not exceeding the seven years to which his management extends, with or without payment of a premium, the whole or any part of the said property to the highest bidder; or may let on farm or manage by himself or another, the whole or any part of such property, or may adopt partly one of such modes and partly another or others of such modes as he may deem most convenient and profitable.

The person to whom the Collector or other officer aforesaid lets the property or through whom he manages it, may be the judgment-debtor or insolvent or any person who holds a decree against the judgment-debtor or insolvent, or a third party as may appear most convenient and beneficial to the parties.

10. The Collector shall from time to time render to the Court an account of all monies which come to his hands or to the hands of the officer aforesaid, and of all charges incurred in respect of the property in his management, and shall hold the balance at the disposal of the Court.

Such charges shall include all debts and liabilities from time to time due to the Government in respect of the property, or any part thereof, and the rent, if any, from time to time due to a superior holder in respect of such property or part.

11. Where the management is at an end and all monies which have come into the Collector's hands have been disposed of, he shall retransmit the papers received by him under Rule 1, together with the proceedings connected with the management of the property, to the Court by post or in such manner as may be most convenient.

12. Every notice issued by the Collector or other officer aforesaid under these rules may be served in the manner prescribed by Section 191 of the

Bombay Land Revenue Code, or if the person to be served is a party to the proceedings in the Court and has a pleader, by forwarding a copy thereof to the Court to be served upon the pleader.

RULES FOR REGULATING THE PROCEDURE OF VILLAGE MUNSIFS.

*Notn. No. 7635, Judicial, dated 17th December 1879, B. G. G., 1879, Pt. I, p. 1001.*

In exercise of the power conferred by Section 37 of the Dekkhan Agriculturists' Relief Act, 1879, the Governor in Council is pleased to prescribe the following rules for regulating the procedure of Village Munsifs:—

1. Every suit in a Village Munsif's Court shall be instituted by presenting to the Village Munsif in person a written plaint in the vernacular language of the district, which should contain the following particulars—

(1) The name, religion, caste, profession and place of abode of the plaintiff.

(2) The name, religion, caste, profession and place of abode of the defendant.

(3) A statement of the circumstances which have led to the institution of the suit.

(4) A list of the plaintiff's documents, if any, and of his witnesses, and whether he requires the Village Munsif's assistance to procure their attendance, or whether he will produce them himself, on the day to be appointed under Rule 5.

2. If the plaintiff sues upon a document in his possession or power, he must produce it with his plaint.

3. The Village Munsif shall reject the plaint at once in the following cases:—

(1) If it appears to the Village Munsif that the subject of the plaint is not within his jurisdiction.

(2) If it appears to him after questioning the plaintiff that the suit is barred by the limitation law.

4. If the Village Munsif admits the plaint he shall number and register it in a Register to be kept for the purpose in the following form:—

| Date of presentation. | No. of Suit. | Plaintiff's name, caste and residence. | Defendant's name, caste and residence. | Nature of claim. | Final order and date thereof. | How executed. |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | | | | | | |

5. When he admits a plaint, he shall fix a convenient day, if possible within 7 days from its institution, for the trial of the suit, and he shall require the plaintiff to appear with his documents and witnesses, if any, on the day so appointed. He shall also forthwith, with the least practicable delay, send for the defendant and personally explain to him the nature of the claim, informing him of the day fixed for the trial and requiring him to be present in person on that day, unless the defendant admits the correctness of the claim and his own liability, in which case the Village Munsif shall record the admission in full and require the defendant to sign or put his mark to the same, and shall also sign it himself.

6. If the defendant does not admit the claim, the Village Munsif shall require him to name his witnesses, if any, and to state whether he will himself produce them or requires the assistance of the Court to procure their attendance, and shall warn him to be present in person with his documents and witnesses, if any, upon the appointed day.

7. Whenever it is necessary to procure the attendance of any defendant or witness, the Village Munsif may require the village officers to produce such person before him; and it shall be the duty of the village officers to obey the requisition of the Village Munsif.

[a] Any Village Munsif specially authorized in this behalf by the District or Special Judge may, in cases where other means fail, exercise the powers of a Civil Court for the purpose of enforcing the attendance of defendants and witnesses[a].

8. On the day appointed for the trial, unless the defendant has previously admitted the claim under Rule 5, in which case he may at once pass a final order, the Village Munsif shall first of all examine the parties, or the persons, if any, permitted to appear for them under Section 68 of the Act, and shall peruse the documents, if any, produced on either side, in order to ascertain the point or points in issue and whether the defendant has any just answer or defence to the suit; and shall then, if necessary, examine the witnesses on either side; and may also send for and examine any other person who may appear to him likely to be able to give useful evidence as to the matters in dispute; and shall then proceed, at once, if possible, to record his final order in accordance with the just merits of the case.

9. If the plaintiff fails without reasonable excuse to attend with his proofs or omits without reasonable excuse to adopt measures to procure the attendance of his witnesses, the Village Munsif shall reject the plaint.

10. If the defendant fails to appear, the Village Munsif shall adjourn the trial to an early day to be fixed by him, and shall meantime take all the measures in his power, with the assistance of the village officers, to procure the attendance of the defendant on such adjourned date: he shall not decide the suit without examining the defendant unless for special reasons to be recorded by him in writing in his final order.

---

[a-a] This para. was substituted for the second para. of Rule 7 (added by Government Notification No. 5585, Judicial, dated 13th August 1880, *B. G. G.*, 1880, Pt. I, p. 708), by Government Notification No. 4431, Judicial, dated 14th August 1903, *B. G. G.*, 1903, Pt. I, p. 1009.

11. If the witnesses on either side or any of them fail to attend on the appointed day, the Village Munsif may, after taking the evidence of those that are present if he considers it necessary for the purposes of justice and for arriving at a satisfactory decision, adjourn the trial for such period as may be necessary to procure their attendance.

12. The Village Munsif shall examine the parties and their witnesses, if any, orally, and it shall not be necessary for him to take down their evidence in writing or make notes thereof; but if he does not do so, he shall embody in his final order the substance of the evidence, together with the points in dispute, and his decision thereon, specifying the amount, if any, awarded to the plaintiff. Such final order shall be deemed to be the decree.

13. If his decision is in favour of the plaintiff, either wholly or in part, he may direct the defendant to pay the amount found due by instalments not extending over a longer period than twelve months.

14. In no case shall he award more than seems to him on a full consideration of all the circumstances and past history of the debt to be justly and equitably due.

15. The final order shall be written in column 6 of the Register mentioned in Rule 4; and the Village Munsif shall give a copy thereof, under his signature, to either party asking for the same.

16. Every order, whether rejecting a plaint or allowing or disallowing a claim, shall be endorsed briefly by the Village Munsif on the plaint.

17. If the decision awards the plaintiff's claim in whole or part, the defendant may pay the money due by him under the decree into the Village Munsif's Court and in such case shall be given a receipt for the same: and it shall be the duty of the Village Munsif to cause such money to be paid over to the plaintiff and to require his receipt for the same, and to enter the fact of such payment in the last column of the Register.

18. If the decree is satisfied in whole or in part out of Court, it shall be the duty of the plaintiff to certify the fact to the Village Munsif, and when he fails to do so, the defendant may apply to the Village Munsif, who shall then make enquiries; and if he finds it proved that the decree has been so satisfied shall refuse to execute it further. The necessary entry to denote satisfaction under this Rule shall be made in the Register.

19. The decree-holder may, at any time within the period allowed by the limitation law, apply to the Village Munsif for execution of his decree or such portion of it as may remain unsatisfied; such application must be in writing and must state that the decree of which execution is sought has remained unsatisfied in whole or in part, as the case may be.

20. In the case of a decree which allows payment by instalments, any default by the judgment-debtor entitles the decree-holder to apply for execution.

[b]20 A. If the Village Munsif receives such an application as is mentioned in Rules 19 and 20 from a decree-holder, he shall number and register it in a Register to be kept for the purpose in the following form: —

Attachment shall be effected by actual seizure, and the property so attached shall be kept in safe custody in or near the village cháudi. Provided that no more property shall be attached under this rule than shall seem to the Village Munsif reasonably sufficient at a fair valuation to cover the amount of the decree remaining unsatisfied.

[a] The Village Munsif may also, if he thinks fit, [c] but subject to the provisions of clause (*l*) of the proviso to Section 266 of the Code of Civil Procedure [c] cause the decree to be executed by attachment of [d] the whole orpart [d] of the salary of the judgment-debtor if he be in the receipt of a sa ary. RULES UNDER SECTION 31 OF THE ACT.

(1) *Revenue Notn., dated 13th August 1877, B. G. G., 1877, Pt. I, p. 731.*

In exercise of the power conferred by Section 31 of Act XIV of 1877, the Governor in Council is pleased to frame the following rules, *viz.*:—

1. All subordinate officers entrusted under the said Act with the collection, receipt, or custody of moneys, or of any valuable property, shall furnish security to the extent of three years' salary.

2. The order of management and the notices required to be issued under Sections 7, 12 and 26 of the Act shall be respectively in the Forms A, B and C, appended to these rules.

3. The Tálukdári Settlement Officer, or other Manager, appointed under the Act, shall make the inquiry prescribed by Section 12, and prepare the Schedule of debts and liabilities and the liquidation scheme, required by Section 17 in accordance with the following rules.

4. He shall ascertain the principal sum or sums originally or from time to time lent by each of the creditors severally, and this sum, or the aggregate of these sums, with 9 per cent. per annum simple interest on the amount of each debt, from the time when each debt was incurred up to the date on which the order of management was published, shall be the amount to be awarded, but subject to the following conditions, (namely):—

(1)—that the amount of interest shall in no case exceed that of the principal;

(2)—that the heir in the second generation of the person who originally incurred the debt shall pay the principal only and no interest;

(3)—that the amount to be assigned in settlement of bonds held for services rendered by the creditor shall be determined by the Manager after hearing evidence as to the nature and extent of the service in question;

---

(1) This Notification, issued under Act XIV of 1877, is kept in force by Act XXI of 1881, Section 2.

(4)—that no interest shall be allowed on debts, accounts relating to which are not produced to the satisfaction of the Manager;

(5)—that when the amount of the original principal is not satisfactorily proved, a deduction of 50 per cent. shall be made from the amount of the debt as it stood at the first stage at which satisfactory proof of the existence of the debt is given;

(6)—that when no accounts are produced, the claim shall be disallowed, unless the debtor acknowledges the receipt of a sum in cash, in which case that sum shall be treated as the principal of the debt, but no interest shall be allowed;

(7)—that interest shall not be allowed on account-debts in the absence of any writing showing that interest on such debts should be allowed;

[ ] (7*a*)—A claim supported by a decree of a Civil Court shall be subject to the same enquiry as any other claim; but in cases where it shall appear to the Manager that the suit was contested, and that the amount awarded either on account of principal or interest by the decree does not exceed by more than 25 per cent. the amount which could have been awarded by the Manager, if no such decree had been passed, the amount so awarded may be allowed, provided clause 1 of this rule be not infringed. But if interest subsequent to decree be claimed, it shall be calculated as if no decree had been passed. [a]

(8)—that all payments made by the Thákur to any creditor, and all profits which have been enjoyed by such creditor towards the liquidation of any debt or liability before the date of the order of management, shall be deducted from the principal sum of the said debt or liability, and interest on the amount so deducted shall be dissallowed from the time of such payment or enjoyment, and the Manager shall determine the amount of profits realized under such enjoyment after examining such proofs as may be produced before him;

(9)—that if the principal of all the debts due by any Thákur with simple interest at 9 per cent. shall exceed the amount which it is estimated will be available for the settlement of the creditors' claims, subject to the provisions of Section 11 of the Act, during a period of twenty years, no interest shall be allowed on such debts as were not incurred by the present Thákur; and that if after disallowing interest on such debts the amount necessary to liquidate the whole of the debts be still in excess of the amount estimated to be available for their liquidation, the rate of interest to be awarded on the remaining debts shall be decreased until the aggregate amount of capital and interest payable falls within the requisite limit.

5. Whenever a bond or decree or other claim has been transferred by sale, gift or otherwise from the original holder to any other person, the present holder thereof must support his claim by the same proofs as if he were the original holder.

---

[a—a] This clause was inserted by Government Notification No. 4113, Revenue, dated 14th August 1878, *B. G. G.*, 1878, Pt. I, p. 502. This alteration in the above rules was made to take effect in respect only of those estates for which a liquidation scheme had not been already sanctioned (*vide* paragraph 1 of Notification No. 4113 of 1878).

[a] 6. All admitted debts shall be satisfied proportionately in the following order:—

1st.—Money lent on the security of the estate.

2nd.—Decreed and bonded debts.

3rd.—Accounts debts. [a]

7. In deciding what claims are admissible, and to what amount they shall be admitted, the Manager may appoint a Committee of experienced natives—consisting of three persons, of whom one only shall be in the service of Government—to assist him, and may re-imburse the said Committee their necessary expenses out of percentage of the rents and profits which he may receive to be reserved by him to cover these and similar charges connected with the discharge of his duties.

8. If the creditors of any debtor themselves produce a schedule of the original sums lent by them severally, signed by the debtor, and both parties assent to the said schedule in presence of the Manager, the Manager may accept such schedule without further investigation, and make it the basis of the liquidation scheme.

[b] 9. If the creditors agree to accept a sum of money from the Manager in immediate satisfaction of all their claims against the debtor, and the Manager shall determine to borrow money from Government for the purpose of making such payment, the Manager shall, on receipt of the orders of Government sanctioning such loan, order payment to be made to the creditors from the Government Treasury, provided that the creditors shall first severally pass receipts in full for all their claims, and that if any fraud is subsequently discovered to have been committed by any creditor in respect to any money received by him under this rule, such creditor shall be liable to forfeit all sums so received, and all claim to further compensation for any debt due to him which may have been notified to the Manager for satisfaction under the Act. The interest chargeable on such loan shall be at the rate of 5 per cent. per annum, or at such rate as may be specially fixed by the Manager, with the sanction of Government, and shall be repayable together with the amount of the loan as provided in Section 11 of the Act. [b]

[c] 10. In estimating the amount of cash to be paid under the last rule in immediate satisfaction of admitted claims the following points are to be considered, (namely):—

(a) The income of the debtor, the amount of the debt and the probability or improbability that the creditor would have been able to recover his debt if the Act had not been passed.

(b) The nature of the particular debt.

(c) The period for which the debt had been outstanding.

(d) The interest hitherto enjoyed by the creditor, the rate of interest originally fixed, and the proportion between the amounts due as principal and interest respectively at the present time. [c]

11. If at any time the condition of a Thákur's estate shall be found sufficiently prosperous, the Commissioner may make such further awards beyond what is permitted by the previous rules, as the circumstances shall seem to him to warrant.

The fact of his having sanctioned a liquidation-scheme shall be notified by the Commissioner under Section 20 of the Act, by a written notice in English and Gujaráti, which shall be published in the *Bombay Government Gazette,* and of which one copy shall be affixed in the Court of the Subordinate Judge within whose jurisdiction the debtor resides, or the bulk of this estate is situated, and one copy in the Court of the District Judge to whom such Judge is subordinate.[a]

*Commissioner, Notn. No. 5092, dated 29th September 1897, S. O. G., 1897, Pt. I, p. 448.*

Under the authority conveyed in Government Resolution No. 4006, dated 28th May 1897, the Commissioner in Sind is pleased to publish the following Rules under the Sind Incumbered Estates Act XX of 1896 :—

4. He shall ascertain the principal sum or sums originally or from time to time lent by each of the creditors severally, and this sum or these sums, with 9 per cent. per annum simple interest from the time when the debt was incurred up to the date on which the order provided for in Section 8 of the Act is published, and no further, shall in each case be the amount awarded, but subject to the following conditions :—

I. The amount of interest shall in no case exceed that of the principal.

II. The heir in the second generation of the person who originally incurred the debt to pay the principal only, and no interest.

III. The amount assigned in settlement of bonds held for service rendered by the creditor to be determined by the Manager after hearing evidence of the service in question.

IV. No interest to be allowed on debts whose accounts to the satisfaction of the Manager are not produced.

V. When the first principal is not satisfactorily proved, a deduction of 50 per cent. to be made from the amount of the debt as it stands at the first page at which satisfactory proof of the existence of the debt is given.

VI. When no accounts are produced, the claim shall be disallowed, unless the Manager is satisfied that the debtor has received a sum in cash, in which case that sum shall be treated as the principal of the debt, but no interest shall be allowed.

VII. Interest not to be allowed on account of debts in the absence of any specification that it shall be allowed.

VIII. A claim supported by a decree of a Civil Court shall be subject to the same enquiry as any other claim ; but in cases where it shall appear to the Manager that the suit was contested, and that the amount

awarded either on account of principal or interest by the decree does not exceed by more than 25 per cent. the amount which could have been awarded by the Manager, if no such decree had been passed, the amount so awarded may be allowed, provided Rule 4, Clause I, be not infringed. But if interest subsequent to decree be claimed, it shall be calculated as if no decree had been passed.

5. All payments made by the Jagirdar or Zamindar to any creditor, or profits which have been enjoyed by such creditor towards the liquidation of any debt or liability before the settlement under the Act, shall be deducted from the principal sum of the said debt or liability, and interest on an amount equal to such deducted sum shall be disallowed from time of such payment or enjoyment, and the Manager shall be competent to decide on the amounts of profits realized under such enjoyment, after examining such proofs as are presented to him.

If the amount be then still in excess of the aforesaid amount, the rate of interest to be awarded on the remaining debts shall be decreased until their amount falls within the requisite limits. For the purposes of calculation under this Rule, (20) twenty years shall be taken as the limit of the period of management.

[a] 8-A. When the Manager awards compensation under sub-section (2) of section 22, he shall award as compensation such principal sum and such interest on the unpaid balance of such sum as may appear to him to be equitable in the circumstances. Such interest shall ordinarily be simple interest at the rate of six per cent. per annum from the date of possession to payment. [a]

9. In deciding what claims are admissible for settlement, and to what amount they shall be admitted, it shall be competent to the Manager to appoint a Committee of experienced Natives—consisting of three persons, of whom one only shall be in the service of Government to assist him, and it shall further be competent to the Manager to reimburse the said Committee for their necessary expenses out of a percentage to be reserved on the rents and profits which the Manager may receive to cover all charges arising directly from the special nature of his duties.

11. In estimating the amount of cash composition to be paid for admitted claims, the following points should be considered :

(*a*) The income of the debtor, the amount of the debt, and the probability that the creditor would have been able to recover his debt if this Act had not been passed.

(*b*) The nature of his particular debt.

(*c*) The period for which the debt had been outstanding.

(*d*) The interest hitherto enjoyed by the creditor, the rate of interest originally fixed, and the proportion between the amounts due as principal and interest, respectively, at the present time.

One copy of the application will be retained by the Executive Engineer or other officer aforesaid; the other will be returned with columns 10 and 11 in the case of an application in the form of Appendix No. 1, and columns 9 to 11 in the case of an application in the form of Appendix No. 1-B, filled in by the Executive Engineer or other officer aforesaid, to the applicant or applicants.

When security may be required.

3-A. If an applicant for water for irrigation is not the registered occupant of the land which he wishes to irrigate, or, in the case of alienated land, if he is not the holder, in whose name the land is entered in the Collector's records, the Executive Engineer, or other officer aforesaid, may decline to comply with the application, except on the execution of a security bond in the form of Appendix No I-A by two persons approved by him in this behalf.

If an order is made under this rule to furnish security, a note thereof shall be made in column 10 of the application in form of Appendix No. I or in column 9 of Appendix No. I-B as the case may be.

Periods within which applications should be made.

4. Perennial crops and crops on land brought under the Block system will invariably be classed as *kharif*. All other crops, for which the first waterings are taken between 15th January and 15th October, will be classed as *kharif*. Applications for wet *kharif* crops (such as rice, &c.) should be made before the 1st May, and for *rábi* crops before the 15th November.

Priority of grant of applications.

Applications for water for monsoon dry-crops may be submitted at any time, but applications received before the 1st of May will have priority over those subsequently made.

In all other cases, applications for water shall be complied with, as far as possible, according to their priority.

Executive Engineer's decisions on applications to be given publicly.

5. The decision of the Executive Engineer on applications for water from each water-course should be given on the spot, as far as possible in the presence of all applicants who should receive notice to attend.

Priority of right to water when supply proves deficient.

6. If, from any cause, the water-supply from a canal proves insufficient to meet all the accepted applications for water, all questions regarding priority of right to receive the available water, and the quantity and regulation of supply, shall be finally determined by the Executive Engineer.

Provided always that (1) applications in respect of lands brought under the Block system shall have priority over all others, and (2) save as aforesaid the claims of those applicants whose applications were made before the 1st of May for *kharif* crops, and before the 15th November for *rábi* crops, shall have priority over those subsequently made.

In cases of emergency a canal may be closed, and the said period, or periods, may be fixed by the canal officer of highest rank on the spot.

*III.—Water-supply Rates for Irrigation.*

Rates how to be fixed.

8. The rates leviable for canal water supplied for purposes of Irrigation will,

(*a*) in the case of lands brought under the Block system be fixed for a term of years at a certain amount per acre, leviable irrespective of the kind of crop irrigated, or the time and mode of irrigation, and

(*b*) in other cases be fixed at a certain amount per acre, varying according to the kind of crop to be irrigated and the season of the year in which it is to be grown, and according as the water is obtainable from the canal by lift or flow.

Rate leviable when no crop is sown after first watering.

9. Except in the case of lands brought under the Block system, when a field receives the first or preliminary watering, and afterwards no crop is sown during the period named in column 8 of the application as that in which the crop for which the water was applied for should ordinarily come to maturity, the lowest rate chargeable for lift or flow (as the case may be) will be levied.

Rate leviable when mixed or several different kinds of crops are grown.

10. Except in the case of lands brought under the Block system, if mixed crops be grown in the same field, or if different crops be grown in different parts of the same field, the rate shall be calculated on the highest rated crop grown during the period for which water is taken.

Rate leviable when first crop fails and a fresh one is sown.

11. Except in the case of lands brought under the Block system, when the crop first sown fails and is ploughed up and a fresh crop is sown in the same season, the rate shall be levied on that crop only which comes to maturity.

Rate leviable when only a part of a field is irrigated.

12. Except in the case of lands brought under the Block system, if only part of a field be irrigated, the rate shall be chargeable on the area of the whole field unless such part shall, from the first commencement of the irrigation, have been clearly demarcated by a ridge not less than half a foot high.

Rate leviable when part of a field is irrigated with well-water and part with canal water.

13. Except in the case of lands brought under the Block system, when a portion of a field has been irrigated with canal-water and a portion with well-water, the rate shall be chargeable on the whole field unless the portion irrigated by well-water shall, from the first commencement of the irrigation, have been clearly demarcated by a ridge not less than half a foot high.

If the portion demarcated for the purpose of being irrigated by canal-water has never the less been partly irrigated by well-water, enquiry shall be made whether the use of well-water was necessitated by a deficiency in the supply of canal-water, and, if it be shown to the satisfaction of the Executive Engineer that it was so, the rate chargeable on the portion irrigated by canal-water shall not exceed the lift rate.

Rate leviable when well-water and canal-water are conveyed in the same course.

14. Except in the case of lands brought under the Block system, if well-water is conveyed to any land irrigated from a canal in the same channel as the canal-water, the water-rate shall be chargeable on the whole of the land irrigated from such channel: Provided that if it be shown to the satisfaction of the Executive Engineer that the use of well-water was necessitated by a deficiency in the supply of canal-water, the rate chargeable shall not exceed the lift rate.

RULES FOR THE ADMINISTRATION OF CANALS IN THE BOMBAY PRESIDENCY.
(RULES 15 TO END).

(1)*Notn. No. 1, Public Works, dated 8th January 1881, B. G. G., 1881, Pt. I, p. 10.*

Under Section 70 of the Bombay Irrigation Act, 1879, the Right Honourable the Governor in Council is pleased to make the following Rules for the administration of Canals in the Bombay Presidency :—

In exercise of the power conferred by the Bombay Irrigation Act, 1879, the Governor in Council is pleased to make the following Rules for the administration of Canals in the Bombay Presidency :—

[a] * * * * * [a]

Provisions applicable to supply from escape channels.

15. The same provisions shall apply to irrigation from escape channels as to irrigation from other parts of a canal.

---

(1) As amended by Notification No. 75, Public Works, dated 4th October 1887, *B. G. G.*, 1887, Part I, page 837.

[a—a] This portion has been omitted, as Revised Rules 1 to 14 for the administration of canals in the Bombay Presidency, in substitution of the original ones have since been made, *vide* Notification No. 2, Public Works, dated 15th November 1904, *B. G. G.*, printed at page 581, *supra*.

Rate leviable for such supply.

When the supply of water from any such channel lasts continuously throughout the period for which it is required for use, the same rates shall be levied as for a supply from the canal. When the supply is intermittent, such reduced rates shall be charged as may be fixed in each particular case under the orders of Government.

Rate leviable for supply of water obtained without permission.

16. If a supply of water is obtained by any person from a canal for the purpose of irrigation without the previous permission of the Executive Engineer of the District, the rates chargeable for such water shall be double the rate chargeable for the authorized irrigation of the area irrigated, and this rate shall be leviable in addition to any penalty which may be imposed under the Act.

Rate leviable for supply of water for forming threshing floors.

17. Water may be given for the purpose of forming threshing-floors free to holders of canal-irrigated fields and to others at a charge per floor not exceeding half the lowest acreage rate.

[a] 17A. In the case of cultivation other than perennial cultivation, where permission has been given to irrigate a specified area in accordance with an application made under rule I, the applicant may, at his discretion and risk, use the water supplied for such area for the irrigation of an area in excess of that so specified; but such use will not entitle him to an increased supply of water or to any remission of water-rate on account of any failure of crop due to such extended use. The rate chargeable for the area specified in the application shall be leviable for such excess area.

*Water-supply Rates for Non-irrigational Purposes.*

For non-irrigational purposes, rates will be charged for by volume or otherwise.

18. Water supplied from a canal for any purpose other than irrigation will be charged for by volume or otherwise at such rate as Government shall from time to time determine.

---

## IV.—Occasional Rates.

Charge to be imposed when water supplied through a water-course is unauthorizedly used.

[b] 19. The charge to be made under Section 45 on account of water supplied through a water-course used in an unauthorized manner shall be as follows (namely):—

(*a*) in Sind:

(*i*) if the water so used has flowed on any land — a sum calculated at such rate per acre or portion of an acre of the land over which the water has flowed as the Collector shall fix, the same not exceeding double the highest rate of assessment leviable in respect of cultivated land in the vicinity;

---

[a] This rule was inserted by G. N. No 1, Public Works, dated 1st February 1909, *B. G. G.*, 1909, Part I, page 208.

[b] New rules were substituted for the original Rules 19 and 20 by G. N. No. 14, Public Works, dated 27th September 1892, *B. G. G.*, 1892, Part I, page 986.

(*b*) Elsewhere:

| | |
|---|---|
| (*i*) if the water so used has flowed on any land and such land has derived benefit therefrom | double the highest rate leviable for a single crop; |
| (*ii*) if the water has flowed on any land, but such land has not derived benefit therefrom | double the rate that would be chargeable under Rule 9; |
| (*iii*) in any other case | double the rate chargeable under Rule 18 on the volume of water estimated by the Executive Engineer for Irrigation to have been used. |

The above charges will be leviable in addition to any penalty which may be imposed under the Act on the person who unauthorizedly used the water.

Charge to be imposed when water supplied through a water-course is suffered to run to waste.

[a] 20. The charge to be made under Section 46 on account of water supplied through a water-course which is suffered to run to waste shall be as follows (namely):—

(*a*) in Sind:

| | |
|---|---|
| (*i*) if the water has flowed on any land | a sum calculated at such rate per acre or portion of an acre of the land over which the water has flowed as the Collector shall fix, the same not exceeding double the highest rate of assessment leviable in respect of cultivated land in the vicinity; |

(*b*) elsewhere:

| | |
|---|---|
| (*i*) if the water has flowed on any land | double the rate that would be chargeable under Rule 9; |
| (*ii*) in any other case | double the rate chargeable under Rule 18 on the volume of water estimated by the Executive Engineer for Irrigation to have been wasted. |

Cases in which remissions may be granted.

[b] 21. (*1*) Remission of the whole or a part of the water-rate payable by any person may be granted where such person has suffered loss

(*a*) from any stoppage, diminution or increase of his water-supply due to any of the causes named in clause (*d*) of Section 31 or to any act or ommission of a canal officer not provided for in the said clause, or

(*b*) from failure of his crops due to any local or general calamity where the failure is total or the outturn does not exceed one-quarter of the normal crop.

[a] New rules were substituted for the original Rules 19 and 20 by G. N. No. 14, Public Works, dated 27th September 1892, *B. G. G.*, 1892, Part I, page 986.

[b] New rules were substituted for the original Rules 21 to 26 (both inclusive) by G. N. No. 1, Public Works, dated 30th May 1908, *B. G. G.*, 1908, Part I, page 450.

Manner of preferring claims.

[a] 23. Claims for remissions under sub-rule (1) of rule 21 shall be preferred to the Executive Engineer for Irrigation of the Division direct; and if not so preferred within one month from the time when the damage in respect of which the remission claimed is alleged to have occurred, shall not be entertained. If, without giving the Executive Engineer at least seven days' notice in writing of his intention, the claimant cuts the crop alleged to have been damaged at any time within 20 days after preferring his application, his claim shall not be entertained.

Inquiry and disposal.

[a] 24. If the application be preferred within the period prescribed by the last rule the Executive Engineer shall, within 20 days after the date of its receipt or within the period of the notice, if any, given to him under the said rule make or cause to be made a local enquiry, at which he or any person acting under his special order in this behalf shall be present, and the result of which shall be recorded on the application. Unless the Executive Engineer has been specially empowered under rule 22 of these rules to dispose of the application himself, the application shall then be forwarded to the Superintending Engineer for disposal.

The order passed on the application shall be communicated to the applicant by the Executive Engineer.

Claims regarding excess charges.

[a] 25. Any claim for remissions under sub-rule (2) of rule 21 of these rules may be preferred direct or through the Collector to the Executive Engineer for Irrigation who unless he has been specially empowered under rule 22 of these rules to dispose of the claim himself, shall forward the application with his opinion to the Superintending Engineer for disposal.

Intimation of remissions.

[a] 26. Intimation of any remissions granted under rule 22 of these rules shall be given by or through the Superintending Engineer, as the case may be, to the Examiner of Public Works Accounts and where the remission is granted by the Superintending Engineer to the Executive Engineer for Irrigation in statements prepared in the form of Appendix No. II.

The Executive Engineer for Irrigation shall keep a register of all authorized deductions from water-rates in the same form.

## VI.—Recovery of Dues.

A return of measurements and assessments in the form of Appendix No. III shall be prepared by such subordinate canal officer as shall from time to time be deputed to this duty by the Executive Engineer of the District and submitted to the Executive Engineer, who, with the aid of his establishment, shall test at least 10 per cent. of the measured areas.

[a] New rules were substituted for the original Rules 21 to 26 (both inclusive) by G. N. No. 1, Public Works, dated 30th May 1908, *B. G. G.*, 1908, Part I, page 450.

Objections to entries in the statement how to be disposed of.

30. If any objection is raised before the Collector, or any of his subordinates, as to any entry in the said statement, such objections shall be forwarded by the Collector, through the Executive Engineer of the District, to the Superintending Engineer for disposal under Rule 24, if it has reference to some action on the part of the Public Works Department; otherwise it shall be disposed of by the Collector, or, subject to the law and rules n force relating to the recovery of arrears of land revenue, by his subordinates.

If in consequence of objection, Collector remits any portion of a demand, his order to be communicated to Executive Engineer.

If the decision of any such objection by the Collector, or any of his subordinates, results in the remission of any portion of any charge entered in the demand statement, the result shall be communicated by the Collector to the Executive Engineer of the District and shall also be shown in the Return No. VII to be submitted, under Rule 37, to the Examiner of Public Works Accounts.

*Appeals.*

RULES FOR THE SUPPLY OF WATER TO THE MILITARY CANTONMENT AND CIVIL STATION OF POONA.

*Notn. No. 8, Public Works, dated 24th September 1897, B. G. G., 1897, p. 1678.*

In exercise of the powers conferred by Section 70 of the Bombay Irrigation Act, 1879, His Excellency the Governor in Council is pleased to finally approve and sanction the following revised rules for regulating the supply of water to the Military Cantonment and Civil Station of Poona in supersession of the rules published in Notification No. 17 at page 948 of the *Bombay Government Gazette* for 1879, Part I. The revised rules will come into force from 1st January 1898:—

RULES FOR THE SUPPLY OF WATER TO THE MILITARY CANTONMENT AND CIVIL STATION OF POONA.

I.—The Executive Engineer for Irrigation, Poona, is responsible for all matters connected with the Poona Water-supply.

II.—Unless by the orders of Government water shall not be supplied for any purpose whatsoever save on payment by meter, except under Rule V and in the special cases of the supply to certain public tanks sanctioned under Government Resolution No. 173 W. I.—453, dated 7th November 1877, paragraph 3.

III.—(*a*) The charge for water as determined by meter shall ordinarily be at the rate of 6 annas per 1,000 gallons, in which case the applicant shall bear the cost of the necessary connections and lay down the service pipes. But when the connections are made and the service pipes laid down at the Government expense by the Irrigation Department, the charge shall be at the rate of 8 annas per 1,000 gallons.

(*b*) The total monthly charge under this Rule shall be subject to the following minimum, in addition to the meter rent as per Rule IV:

| | | Rs. | a. | p. | |
|---|---|---|---|---|---|
| ½ inch pipes | ... ... | 1 | 8 | 0 | per month. |
| ¾ " | ... ... | 2 | 0 | 0 | " |
| 1 " | ... ... | 3 | 0 | 0 | " |

IV.—The meters will be provided and fixed at Government expense, and a charge of 8 annas per month shall be levied as rent for each meter in addition to the charge for water calculated as above.

V.—(*a*) For small houses in the several bazárs and their vicinities, and in special cases (to be sanctioned by the Chief or Superintending Engineer,

C. D.) for certain small houses without gardens elsewhere, the rates shall generally be according to the diameter of the attachment, as follows:—

| | Rs. | a. | p. | |
|---|---|---|---|---|
| ⅜ inch attachment ... ... | 1 | 0 | 0 | per month. |
| ½ " " ... ... | 1 | 6 | 0 | " |
| ¾ " " ... ... | 2 | 0 | 0 | " |
| 1 " " ... ... | 3 | 0 | 0 | " |

(*b*) The above rates shall be paid for the draw off from one point only, that is, from one stand-post, one tap or any other method of draw-off from the private pipe attached to the Poona water-supply main.

(*c*) The same rates shall be paid for every additional stand-post, tap or other method of draw-off from the same attachment.

VI.—(*a*) When a house is unoccupied and the owner not in receipt of rent for the property, only one-half the rates in Rule V shall be charged.

(*b*) The Executive Engineer for Irrigation shall, if he considers it advisable, order the attachment cock to a vacant house to be closed, in which case no charge shall be made for water. The charge for re-admitting water to a house shall be half the rates fixed for new attachments as laid down in Rule XI.

VII.—Should it appear advisable to the Executive Engineer, a meter may be affixed to the service pipes from any attachments coming under Rule V, and after a clear month's notice, with the sanction of the Chief or Superintending Engineer, C. D., the charge may be made under Rules III and IV for the water-supply.

VIII.—The meters shall, wherever practicable, be placed inside the compound or premises of the landlord or occupier, and when so placed the landlord shall be held responsible for any damage to the meter, and shall be liable on account of the cost of all repairs, except those due to fair wear and tear.

IX.—If on examination any meter shall be found to be out of order, and consequently not registering correctly, the consumption during the period since the last reading till a proper meter is attached shall be calculated at the average daily consumption of the last registered period during which, in the opinion of the Executive Engineer, the meter was registering correctly, and the consumption of water was not for any reason abnormal.

X.—The water rate and meter rent is to be collected either monthly or quarterly, at the discretion of the Executive Engineer, by bills prepared in his office. In order to facilitate the adjustment of accounts between landlords and tenants, the Executive Engineer will, when called upon in writing, furnish a memorandum showing the consumption and probable charges on account of water rate and meter rent for any broken period of the month or quarter since the preparation of the last bill in his office.

XI.—(*a*) Application for attachments to be made to the Executive Engineer for Irrigation, Poona, who is authorized of himself to comply with applications from the owners of the property, who are required to lodge the cost of the attachment and to sign an agreement promising to pay for the water-supply under the rules and at the rates sanctioned by Government from time to time. In any other cases, the special sanction of the Chief or Superintending Engineer, C. D., must be previously obtained.

(*b*) The fees to be paid in advance for making attachments shall be as follows:—

| | | | Rs. | a. | p. |
|---|---|---|---|---|---|
| $\frac{3}{8}$ inch attachment | ... | ... | 1 | 8 | 0 |
| $\frac{1}{2}$ " " | ... | ... | 1 | 8 | 0 |
| $\frac{3}{4}$ " " | ... | ... | 2 | 0 | 0 |
| 1 " " | ... | ... | 2 | 8 | 0 |
| $1\frac{1}{2}$ " " | ... | ... | 5 | 0 | 0 |

(*c*) In the case of attachments having to be temporarily closed at the request of the owner, a charge shall be made at half of the above rates paid in advance, and shall include the cost of closing and re-opening the attachment.

XII.—The Executive Engineer for Irrigation, Poona, shall have power to cut off the connection between the private pipes and the public main in any of the following events.

*1st.*—In default of payment of water rates and meter rents, or of any bill submitted on account of repairs to meters, under Rule IV, within twenty days after the same shall have been demanded in writing.

*2nd.*—If any house-owner or occupier who is supplied with water under Rule V shall permit the supply of water to other than those persons residing on the premises, or shall use the water for purposes in violation of the conditions on which it is granted, provided that six days' printed or written notice be given previously from the Executive Engineer's office.

*3rd.*—In cases of leakage of pipes or other defects in the private service arrangements likely to cause loss to Government, provided that forty-eight hours' notice be given previously from the Executive Engineer's office.

*4th.*—If water, not charged for by meter, shall be allowed to run to waste after the owner or occupier shall have been warned in a printed or written notice from the Executive Engineer's office not to allow it to do so.

*5th.*—In the case of broken pipes or fittings causing loss of water likely to cause damage to property, when such notice as may be possible shall be given.

*6th.*—In the case of refusal to allow the Executive Engineer or his authorized agent to enter on any land or building for the purpose of inspecting service pipes, fittings, &c.

[a] *7th.*—If the house-owner fails to imbed pipes which are exposed or lie above the ground surface or to remove pipes from situations where in the Executive Engineer's opinion the water-supply is liable to contamination, in each case within a period of one month from date of issue of a written notice from the Executive Engineer's office. This clause applies only to cases where the pipes have been laid by landlords or occupiers and where under the rules they are responsible for defects in the same.[a]

---

[a-a] This clause was added by G. N. No. 1, Public Works, dated 26th February 1902, *B. G. G.*, 1902, Pt. I, p. 344.

XIII.—The Executive Engineer for Irrigation shall have the power to open any road for the purpose of laying new mains, service pipes to private houses, or for any purpose in connection with the distribution of water, and shall be responsible for the efficient repairs to the road, drains or any structure that has to be removed in order to carry out the work referred to.

XIV.—Service pipes to private properties shall be laid by plumbers selected by the Executive Engineer for Irrigation under conditions and rules approved by the Chief or Superintending Engineer, Central Division, and the final connection between the private service pipes and the Poona water-supply mains shall not be allowed until the work has been inspected and passed by the Executive Engineer or his authorized agent.

XV.—Landlords or owners of property shall be solely responsible for the payment of all charges preferred under the above rules. The Executive Engineer for Irrigation may however receive payment by (1) an agent, or (2) a tenant, duly authorized by the owner of the house or property, who in any case shall be held responsible in default of payment by his agent or tenant.

[a] If any payments due under these rules on a house or property which is sold or whose ownership is transferred remain in arrears the supply of water shall be stopped until the arrears are cleared[a].

XVI.—Nothing contained in the above rules shall hinder the prosecution of any person under Act VII of 1879 for any act or omission made punishable under the provisions of the said Act.

## RULES AND ORDERS UNDER BOMBAY ACT I OF 1880.

### (Khoti Settlement.)

RULES UNDER CLAUSES (*a*), (*b*), (*e*) AND (*f*) OF SECTION 40 OF THE ACT.

*Notn. No. 1659, Revenue, dated 11th March 1882, B. G. G., 1882, Pt. I, p. 262.*

In exercise of the power conferred on him in this behalf under Section 40 of the Khoti Settlement Act, 1880 (Bombay Act I of 1880), the Governor in Council is pleased to frame the following Rules under Clauses (*a*), (*b*), (*e*) and (*f*) of that Section (namely) :—

*Crop Appraisement Rules under Clause (a).*

[a] I. Whenever the rent payable to the khot consists of a share of the produce of the tenant's land, the amount of produce claimable by the khot shall be ascertained by an estimate of the probable yield of the crop of each field to be made by the khot on an inspection of the crop a reasonable time before the same is ready for reaping in the presence of the tenant, or a member of his family appointed by him in writing for that purpose, or his legally appointed agent, and of two respectable witnesses, one of whom is able to read and write, provided that unless the tenant otherwise desires the khot shall inspect and appraise the crops specified below on or before the dates entered below :—

*Halwa Nágli.*—On or before the 10th September.

*Other Halwa crops.*—On or before the 1st October.

---

[ ] New Rules were substituted for the original Rules I, III, IV, V, VI, VIII and X by G. N. No. 6720, Revenue, dated 22nd September 1886, *B. G. G.*, 1886, Pt. I, p. 803.

*Late crops*, that is harik, kulith, udid, tág, and túr.—On or before the 15th November.

*Other late crops.*—On or before the 1st November.

*Rabi, e. g., gram, &c.*—On or before the 1st March.

*Summer crops, e. g.*, páwta, &c.—On or before the 20th March.

*Hot weather crops, e. g.*, rice (wáigan), náchni (gimvas), jack-fruit &c.—On or before the 20th May.

Provided further that in the case of bágáyat crops the Mámlatdár or Mahálkari shall decide what constitutes a reasonable time within the meaning of this rule.

II. The days fixed by the khot for inspection and appraisement of crops shall be notified by him in writing to all and every one of his tenants in the village, and the Police Patel shall be directed by the Collector to affix notices to the temples and by beat of drum and otherwise to make these dates known at least seven days previously, and if for any sufficient cause (as that the crop is not ripe, &c.) any crop is not inspected or appraised on the days so fixed, the inspection and appraisement shall not, except with the consent of the tenant, take place until after a similar second notification has been made in the village. But the date fixed by the second notification must be within the limits specified in the preceding rule.

[a] III. If notwithstanding that the days fixed for the inspection and appraisement have been notified as aforesaid, the tenant, or a member of his family appointed by him in writing for that purpose, or his legally appointed agent, is not present in his field on the days so fixed, the khot shall nevertheless proceed to inspect and appraise such tenant's crops and shall inform such tenant in writing of the appraisement so made within 24 hours of the same by sending him a copy of the entries relating to his fields by the khot in the abhavani patrak mentioned in the rule immediately following.

[a] IV. It shall be the duty of the khot to keep a book to be called the abhavani patrak in such form as the Collector may, from time to time, prescribe in which he shall at the time of every inspection and appraisement that he shall make, enter on the spot the particulars of such inspection and appraisement, or cause the same to be entered. Each entry in the said book shall bear the date on which it is made, and shall be signed by the khot making the inspection and appraisement, by both witnesses, and also, if the tenant or a member of his family appointed by him in writing for that purpose, or his legally appointed agent be present and admit the correctness of the entry, by the tenant, such member of his family, or such agent, provided always, that such tenant, member or agent is able to write his name and does not use a mark.

[a] V. The khot shall be bound, if the tenant, or a member of his family appointed by him in writing for that purpose, or his legally appointed agent is present, to give him then and there a signed copy of the entries relating to his fields made in the abhavani patrak. If the tenant admits the correctness of the entries and has brought his receipt-book, the entries shall be copied on the debit side of the receipt book. In all other cases the copy shall be on a separate slip.

---

[a] New Rules were substituted for the original Rules I, III, IV, V, VI, VIII and X by G. N No. 6720, Revenue, dated 22nd September 1886, *B. G. G.*, 1886, Pt. I, p. 808.

[a] VI. An entry duly made in the abhavani patrak in accordance with the foregoing provisions, and signed with his name by the tenant or a member of his family appointed by him in writing for that purpose, or his legally appointed agent shall be conclusive evidence of the facts therein recorded, and the appraisement shall be deemed to be final; and an entry so made when the tenant, or a member of his family appointed by him in writing for that purpose, or his legally appointed agent fails to be present, shall be presumed to be correct until the contrary is proved in the manner prescribed in the next following rule, and provided the tenant has been informed of the appraisement in the manner prescribed in the last part of Rule III.

VII. A tenant who has not signed the abhavani patrak, or who has signed it with a mark only, may, if dissatisfied with the appraisement, petition the Mámlatdár or Mahálkari of the Táluka or Mahál in which the village is situate, within six days of the khot making the appraisement, and such officer shall forthwith nominate three respectable inhabitants of the village or its neighbourhood to inspect and appraise the crop within seven days. The appraisement made by such persons, or a majority of them, shall be final and shall be entered by the khot at the time it is made in the Abhavani Patrak, and the entry shall be signed by the said three persons or the majority of them.

[a] VIII. If the khot fails to keep an abhavani patrak or to inspect or appraise the crop at the time and in the manner laid down in Rule I or to make an entry or to cause the same to be made therein in the manner hereinbefore provided, or to give information to the tenant in the manner provided in Rule III, he shall be entitled to recover from the tenant such rent only as may be due according to the yield of the crop admitted by the tenant.

IX. It shall not be lawful for a tenant to reap his crop until after the same has been inspected and appraised, or until the expiry of the dates mentioned in Rule I within which the inspections and appraisements of crops by the khot should be completed. If the tenant reaps his crop in contravention of the above rule every presumption on doubtful points shall be made in the khot's favour.

[a] X. If the tenant without making a petition under Rule VII reaps his crop after it has been inspected and appraised by the khot in the presence of such tenant or a member of his family appointed by him in writing for that purpose, or his legally appointed agent, or after the khot has given such tenant information in the manner provided in Rule III, he shall be deemed to have admitted the correctness of the khot's estimate.

*Rules under Clause (b).*

I. An entry in the Paháni Kharda of *Dhára*, if not rebutted, shall be conclusive proof of *dhára*. If the Paháni Kharda only shows that a certain area was held as *dhára*, but gives no *thikáns*, the land to be entered as *dhára* shall be chosen at the discretion of the Settlement Officer from the survey numbers in the rayat's possession; always provided that the area and the proportion of rice to Varkas land which may be given in the Paháni Kharda be not exceeded, and that if no information is available as to the said proportion, it shall be assumed to be 1 acre of rice to 4 acres of Varkas.

---

[a] New Rules were substituted for the original Rules I, III, IV, V, VI, VIII and X by G. N. No. 6720, Revenue, dated 22nd September 1886, *B. G. G.*, 1886, Pt. I, p. 808.

II. Where there is no Paháni Kharda but a Goshwára entry only, this entry if not rebutted, shall be conclusive proof that the Khátedár holds some *dhára*. To ascertain the area of his *dhára* it will be necessary to discover at what rates the land assessment of the village was fixed. Evidence of this may be obtained from the Paháni Khardas of surrounding villages or otherwise. The Settlement Officer shall then proceed as in the last clause of Rule I. If the land assessment rates cannot be ascertained to the satisfaction of the Settlement Officer, the highest rate known to have existed at the date of the Goshwára must be taken as a basis and the same procedure followed.

III. The evidence of entry in Paháni Kharda or Goshwára may be rebutted by the khot producing written proof from his accounts that he has taken "*Thal*" or *Makta* payments for three consecutive years within the twelve years preceding the introduction of the survey. In "*Thal*" he must show for Varkas land payments in successive years from the same land of the three crops of Náchni, Wari, and Harik.

IV. If there is no Paháni Kharda or Goshwára, the possession of *dhára* may be proved by the production of receipt-books showing *dhára* payments for a sufficient number of years to satisfy the Settlement Officer. If no thikáns are given in the receipt-books, he shall proceed as in the last clause of Rule I.

V. If a rayat is proved to hold some *dhára*, and if it is not proved that any of the land in his possession has paid *thal*, the whole of the land in his possession shall be entered as *dhára*.

*Rules under Clause (c).*

I. When a khot sharer sells any of his private khoti land (Khoti Khásgi), the buyer thereof shall be entered in the survey papers in respect of that land as an occupancy tenant paying customary rates with the right to alienate his land.

II. A Khelta Dhárekari shall be bound every year, on or before the 30th April, to give notice to the khot, stating what fields in the Khoti Nisbat Kháta he intends during the ensuing season to cultivate at *dhára* rates. If he fails to do so, he will be presumed to have waived his right for that season and will have to pay "*Thal*" for any khoti land that he does cultivate.

III. The rent payable to the managing khot by khot sharers for their private khoti land shall be the customary rates of the village for occupancy tenants, unless it is proved that before 1865 khot sharers paid a *Makta* or a lower rate of "*Thal*," in which case the ancient practice shall be followed.

IV. Land about which there is, or has been, a boundary dispute between two villages shall be entered in the name of the occupant as follows:—

(*a*) If both villages are Niwal Dhára as *dhára* land.

(*b*) If both villages are Niwal Khoti, as occupancy tenant's land paying ardhel and tirdhel.

(*c*) In any other case, as occupancy tenant's land paying survey assessment and local fund cess only.

V. [a] . . . . . [a] A Khelta Dhárekari has no right to cut trees.

---

[a]—[a] The first sentence of this rule was rescinded by Notification No. 6972, dated 12th October 1887, *B. G. G.*, 1887, Pt. I, p. 853.

VI. The khot shall keep under Section 15 the following three accounts :—

1. The Appraisement Register.
2. The Ledger.
3. The Rayat's Receipt-books.

They shall be kept in the forms hereunto annexed (Appendix I).

The Appraisement Register shall be filled up at the time of the crop appraisement in the manner laid down in Rule IV of the Appraisement Rules under clause (*a*) of Section 40.

The Ledger is to be kept in the ordinary form of debit and credit account, showing the amount due from and paid by each rayat in a separate kháta for each kháta of the Botkhat. The items of the debit side of the rayat's account relating to grain payments are to be written up within 15 days from the date within which the appraisement of the crops to which the items severally relate must be made under the Appraisement Rules.

The rayat's receipt-book is to be written up on the debit side, in cases of grain payments, within one month from the several dates within which the appraisement of the crops must severally be made; in cases of dhára or quasi-dhára payments, before the 1st September.

Whenever a payment is made by a rayat, a receipt is then and there to be entered by the khot on the credit side of the rayat's receipt-book and the book returned to its owner.

If the rayats do not bring their books to be written up on the debit side within the proper time, the khot shall immediately on the expiry of the period make a report to the Mámlatdár or Mahálkari to that effect, who will then issue the necessary instructions to the rayats.

If a rayat brings grain or cash in payment of his revenue to the khot without bringing his receipt-book also, the khot shall accept the payment, but note the omission in the entry of payment in the rayat's kháta and give a separate dated receipt.

All the account-books must be brought or sent by the khot to the kacheri of the Màmlatdár or Mahálkari to be sealed on or before the 1st July of the year preceding that for which they are to be used. This includes fresh rayat's receipt-books which must be handed over to the khot for this purpose by the rayat on or before the 1st June of the year preceding that in which they are to be first used.

Every page of every account-book shall be sealed. The books for the first two accounts shall be provided by the khot. Each rayat shall provide his own receipt-book. Besides the three accounts above mentioned the khot shall take a copy of the *Botkhat* at his own expense, and shall keep it properly corrected, as the Mámlatdár or Mahálkari shall notify.

The copy of the *Botkhat* so made shall, if the village be attached, be delivered up by the khot to the Mámlatdár for the use of the Japtidár, and on the attachment ceasing shall be returned to the khot. The khot shall also take a copy of the "*Sud*" and "*Phalni*" books. If he does not do so, he will be responsible for any mistakes that might have been prevented by the use of those books, but shall not be subject to any other penalty.

The managing khot shall be bound to provide a convenient place within the boundaries of the village itself to which the rayats may bring their payments whether in cash or kind. He shall not be entitled, on any pretence whatever, to require a tenant to pay his rent in any other place except the village in the survey papers of which the tenant's name is entered.

VII. The *Botkhat* shall be in the form hereto annexed. (Appendix No. 1, Form No. 1). The customary rates of the village shall be recorded in full at the bottom of the *Botkhat*.

Any corrections ordered to be made in the *Botkhat* shall be signed by the Mámlatdár or Mahálkari.

If a proper *wántap* or division has been made, each khot sharer shall be denoted by a number and each rayat's kháta containing khoti land shall have the said khoti land entered with the number denoting the khot sharer in whose share the land is affixed to the survey number, and all the survey numbers in the share of one particular khot sharer shall be entered consecutively.

In all cases in which the Settement Officer has decided that khoti land is alienable by a tenant, the fact shall be entered in column 5 of the *Botkhat* by the Mámlatdár or Mahálkari.

*Rules under Clause (f).*

I. No forfeiture under Section X shall be certified in the case of an occupancy tenant unless he has failed to pay rent for two consecutive years, nor if the tenant is a minor, shall any forfeiture be certified until two years after he has attained his majority and has failed to pay rent.

II. If the khot is in actual possession when the minor attains his majority and refueses to vacate, the Collector shall, on the minor's application, put him in possession.

III. If from any cause whatever, except the necessity of keeping fallows, an occupancy tenant fails to cultivate his land, the khot may cultivate it for him during that season, just as if it were khot-nisbat land, but if he does so cultivate, he shall be entitled to no assistance under Section 14.

IV. The form of written application under Section 12 shall be as follows :—

To the Collector of Ratnagiri.

I (*or* we), the undersigned khot (*or* khot sharers) of the village of (—) do hereby certify that I (*or* we) have conferred on *A. B.* the rights and privileges of a dhárekari (*or* quasi-dhárekari, &c., *as the case may be*) in respect of the Survey numbers and Pot or Phálni numbers of the said village tabulated below :—

VI. The dates for the payments of instalments of the khot's jama shall be as at present, *viz.*, 15th December, 1st February, 15th March, 1st May.

The dates for payment of rents by dhárekaris and quasi-dhárekaris shall be the same as for khots; but a dupetkari shall pay his grain rents on the same dates as occupancy tenants do.

Occupancy tenants shall pay their grain rents as follows:—

On the 15th December—

On the 1st June—

except Bágáyat, the *Thal* payment for which must be paid within what the Mámlatdár or Mahàlkari in each disputed case may consider a reasonable time.

If the occupancy tenant pays a Makta he shall pay it in three equal instalments on the 15th December, 1st February and 15th March.

In exercise of the power conferred by Section 4 of the Bombay Highway Act, 1883, the Governor in Council is pleased to make the following rules for the assessment and recovery of the tax from time to time leviable under the said Act in any local area notified under Section 2 thereof (namely):—

### PRELIMINARY.

"Collector" defined.

1. In these rules the word "Collector" means, in a Military Cantonment, the Cantonment Magistrate, and elsewhere the Collector of the district, or such other officer as he empowers to carry out these rules.

### ASSESSMENT.

Assessment book to be kept.

2. The Collector shall cause to be prepared once a year, in a book to be provided by him for this purpose, a list of the persons liable to the said tax, showing in distinct columns :—

(*a*) the names and residences of such persons ;

(*b*) the description of vehicles or animals in respect of which they are respectively liable to the tax ;

(*c*) the amount of tax for which each such person is assessed for each quarter of the year ; and

(*d*) the amount of the said tax, if any, remitted in each quarter under clause (*b*) or (*c*) of Section 3 of the Act.

The said book shall be kept at the office of the Collector and shall be open to the inspection of any respectable resident of the local area within which the tax is leviable.

Returns to be required by the Collector from persons supposed to be liable to the tax.

3. To enable the Collector to have such list prepared he shall send to every person, supposed to be liable to the payment of the tax, a schedule which he shall desire him to fill up with such information respecting the vehicles and animals owned by such person, or in his charge, as the Collector thinks necessary for the assessment of the tax, and to return it, under his signature or mark, within one week from the receipt thereof.

Every person to whom any such schedule is sent shall be bound to fill up and return the same as so required, whether he be liable to be assessed with the tax or not.

Persons liable to be assessed.

[a] 3*A*.—The person who keeps any vehicle or animal for use, whether he be the owner thereof or a person who hires it or has the loan of it, or has charge of it in any other capacity, shall be deemed to be the person liable to be assessed with the tax.

[a] This rule was inserted by G. N. No. 32, Public Works, dated 13th June 1884, *B. G. G.*, 1884, Pt. I, p. 445.

If one and the same vehicle or animal be so kept for use in any quarter by two or more different persons, each person who so keeps the vehicle or animal for more than fifteen days shall be assessed with the tax according to the provisions of the Act: provided that,

(*a*) if a vehicle or animal is kept for use by several different persons, other than the owner thereof, consecutively in one quarter, all or some of whom are not liable to the tax, owing to their not keeping the vehicle or animal for more than fifteen days each, the owner of the said vehicle or animal shall, if resident within the local area in which the tax is leviable, be assessed with the quarter's tax or with the portion of the quarter's tax not recoverable from any of the said persons, as the case may be;

(*b*) the aggregate of the sums recovered from any two or more persons for any one quarter in respect of any one vehicle or animal shall not exceed the full amount of the tax leviable for that quarter in respect of such vehicle or animal.

Notice to be given to the Collector by persons who become newly possessed of vehicles or animals liable to the tax.

4. Every person who becomes possessed of any vehicle or animal, in respect of which he will be liable for the first time to the tax aforesaid, shall be bound, within fifteen days of his becoming possessed of the same, to give notice thereof in writing to the Collector.

Claims to total or partial exemption how to be notified.

5. Every person, who claims under clause (*b*) or (*c*) of Section 3 of the Act to be exempt from two-thirds or from the whole of the said tax in respect of any vehicle or animal owned by him or in his charge during any quarter, shall forward by post to the Collector, or leave at his office, not later than the last day of such quarter, a notice in writing, under his signature or mark setting forth the facts on which such claim is based.

The Collector may inspect stables, &c., and summon persons to give information.

6. The Collector, or any person authorized by him in this behalf, may:—

(*a*) at any time between 5 A. M. and 7 P. M. enter and inspect any stable or coach-house or any place in which he may have reason to believe there is any vehicle or animal in respect whereof the aforesaid tax is leviable;

(*b*) summon any person whom he has reason to believe to be liable to the said tax, or any servant of such person, and to examine such person or servant as to the liability of such person to the tax, and as to the number and description of the vehicles or animals, if any, in respect of which such person is so liable.

## COLLECTION.

Tax for what quarters and when leviable.

7. The said tax shall be payable for each of the following four quarters of every year, *viz.*:—

(3) 1st July to 30th September;

It shall ordinarily be payable in arrear on the first day of the quarter next following that for which it is due; but in the case of a person who ceases to be a resident of the local area in which the tax is leviable at any time during the currency of a quarter, it shall be payable one week before such person's departure from the said area.

Bills to be presented.

8. When any tax shall have become due, the Collector shall, with the least practicable delay, cause to be presented to the person liable to the payment thereof a bill for the sum due. The bill shall specify the quarter, or portion of the quarter, and the vehicles or animals in respect of which the tax is charged and the name of the person from whom it is claimed, and shall contain a notice that the amount of the bill must be paid into the Collector's office within fifteen days from the date of the presentation of the said bill.

Hearing of complaints.

9. Complaints against the assessment of any tax under these Rules or the amount thereof, may be made to the Collector by application in writing forwarded by post or left at his office, at any time within seven days from the date of the presentation of the bill for such tax, and upon hearing such complaints the Collector may make such amendments, if any, in the book kept under Rule 2 and in the bill as he shall think proper, and if he thinks that the complainant is not liable to the tax, he shall cancel the bill.

Notice of demand.

10. If any bill, which is not cancelled under the last preceding Rule, is not paid by the person from whom payment is claimed, or on his behalf, within fifteen days from the presentation thereof, the Collector may cause to be served upon the defaulter a notice of demand in Form A, hereto annexed, or to the like effect, and if he do not within fifteen days from the service of such notice of demand pay the sum due, or show sufficient cause for non-payment of the same, to the satisfaction of the Collector and if no appeal shall have been preferred and the amount of the tax deposited as hereinafter provided, such sum, with all costs, may be levied by order of the Collector under a warrant in Form B, hereto annexed, by distress and sale of the goods and chattels of the defaulter.

For every notice of demand under this section which the Collector shall cause to be served upon any person, a fee not exceeding one rupee, the amount of which shall be in each case fixed by the Collector, shall be paid by each person. Such fee shall be added to the amount of the tax in respect of which the notice is given, and, if not duly paid, shall be levied as costs in the same manner as such tax may be levied.

Goods of defaulter wherever found may be distrained.

11. The goods and chattels of any person from whom any tax is due may be distrained, wherever the same may be found, for default in the payment of the money due from such person.

Inventory, notice of distress.

12. The officer charged with the execution of a warrant of distress shall make an inventory of the goods and chattels seized under any such warrant, and shall at the same time give a notice in writing, in Form C, hereto annexed, to the person in possession thereof at the time of the seizure, that the said goods and chattels will be sold as therein mentioned.

Sale.

13. If the warrant is not in the meantime discharged or suspended by the Collector the goods and chattels seized shall be sold under the orders of the Collector, who shall apply the proceeds, or such part thereof as may be necessary, in discharge of the tax and of the costs payable by the defaulter, and the surplus, if any, shall be returned on demand to the person in possession of the goods and chattels at the time of the seizure.

Fees.

Fees shall be payable upon distraints under these rules at the rates set forth in Table D, hereto annexed, and shall be recoverable from the defaulter as costs in addition to the amount of the tax.

Collector may sue instead or on failure of distress.

14. Instead of proceeding by distress and sale, or, in case of failure to realize by distress the whole or any part of the sum due by a defaulter, the Collector may sue the defaulter in any Court of competent jurisdiction.

APPEALS.

When and to whom appeals may be made.

15. Appeals against any tax assessed and claimed under the foregoing provisions shall be heard and determined, in Military Cantonments by the Cantonment Committee, and elsewhere by the Commissioner of the Division, or by such other officer as Government from time to time direct. But no such appeal shall be heard unless :—

[a] 16. It shall be lawful for the Collector to direct that any balances of tax which have remained due for more than one year may be written off if, after the requisite enquiry, he is satisfied that they are irrecoverable.

Contributions are not to be levied on salaries drawn in respect of temporary appointments. The contribution of an Officer or Servent on leave is to be calculated on his leave allowance, and, if in the acting arrangements made in consequence of his absence any substitute be appointed who holds no subsantive appointment in the Municipal Service, a deduction shall be made from the pay of such substitute equal to the additional contribution which such Officer or Servant on leave would have been subjected to if he had not been on leave.

No pension or gratuity payable to officers, &c., who are ineligible, or who have not availed themselves of right to contribute.

10. No pension or gratuity shall be payable to any Officer or Servant who, under regulation 2, may be ineligible, or who, though eligible under that regulation, shall not have availed himself of the right to contribute pursuant to the conditions in that behalf hereinbefore prescribed.

11. Subject as hereinafter provided, a pension or gratuity shall, on his retirement or discharge from Municipal service, be payable to every Officer or Servant who, having contributed under these regulations, shall have attained the age of 55 years, or been duly certified under Regulation 13 as incapacitated for further service, or whose services, shall have been dispensed with in consequence of reduction or reorganization of establishment, and not from any fault of his own. Provided, however, that the Corporation may, if circumstances shall, in their opinion, render it just or proper so to do, treat any particular case as a special case, and by special resolution allow an Officer or Servant who has voluntarily resigned or been dismissed as aforesaid to receive such pension or gratuity as they may think proper, not exceeding the limits prescribed by regulation 15.

No pensions or gratuities to be payable to officers, &c., voluntarily resigning before 55 (unless incapacitated) or to officers, &c., dismissed for misconduct, and no refunds of contributions to be made to such officers, &c.

Every Officer or Servant who, being under the age of 55 years, shall apply for permission to retire from Municipal service on pension or gratuity shall be examined by the medical authority, and unless the medical authority shall certify that the applicant is incapacitated for further service and the cause of such incapacity, and that such incapacity is not due to the applicant's own misconduct, his application for pension or gratuity shall be disallowed. Provided, however, that if at the time of making such application the applicant is absent from India on leave or otherwise, a similar certificate by a duly qualified surgeon or physician, countersigned by a Justice of the Peace, Magistrate, or Judge may be accepted in lieu of the certificate of the medical authority.

Commissioner be of opinion that the applicant's character or conduct have not been such as to render him deserving of the full pension or gratuity applied for, he shall recommend such lower rate of pension or gratuity as he shall think fitting. The Standing Committee, in disposing of such applications, shall have regard to the rates for pension and gratuities prescribed by regulation 15, but in the case of any recommendation as aforesaid for a lower rate, the Standing Committee shall not have power to increase such rate.

(*c*) After twenty-five years' service a monthly pension of half of the average monthly salary during the preceding five years of service of the Officer or Servant applying for pension subject, however, to a maximum limit of Rs. 416-10-8 for pension.

(*e*) A gratuity in lieu of pension shall be payable to an Officer or Servant entitled under regulation 11 who shall have completed five years' service but shall not have completed fifteen years' service. Such gratuity shall be calculated upon the basis of the average monthly salary during the preceding five years of service of the Officer or Servant applying for gratuity and shall be equal to one month's salary calculated on that basis for each completed year of service, subject, however, to the maximum limit of twelve months' salary so calculated.

Provided however that, in calculating the average monthly salary of an Officer or Servant for the purposes of this regulation, any reduced salary which he may have received while on leave shall not be taken into account, but the average shall be calculated as if such Officer or Servant had, while on leave, been in receipt of the salary of his appointment which he was drawing immediately before taking leave, and provided also that in the case of an Officer or Servant who during the last five years of his service has, through no fault of his own, drawn a diminished salary, the average shall be calculated on the

monthly salary of such Officer or Servant during those five consecutive years of his service in which his salary may have been highest.

Date from which pension to commence.

16. Pension shall commence from the date of retirement or discharge but if an Officer or Servant to whom a pension is payable shall be on leave and unable to rejoin his appointment, his pension shall commence from the date of the medical certificate under regulation 13, if such certificate is required; otherwise from such date as the Standing Committee shall direct.

What leave to count in calculating period of service.

17. In calculating the period of service of an Officer or Servant, privilege and casual leave and ordinary furlough admissible under the Leave Rules shall count as service, but no other sort of leave shall count.

Service to be continuous.

18. Service in order to count for pension or gratuity must be continuous. Provided (1) that periods (if any) of leave which, under regulation 17, would not count as service shall not be deemed to constitute breaks of service so as to prejudice the continuity of the service preceding and subsequent to such leave, and (2) that should an Officer or Servant whose services have been dispensed with, or who has resigned, be re-employed, it shall be in the discretion of the Standing Committee to condone the break in his service and to allow his former service to count. Provided that he has not received any pension or gratuity in respect thereof, or that, if he has received any such pension or gratuity, he refund it with or without interest as the Standing Committee shall determine. Breaks of service already condoned under the Old Rules shall be deemed to have been condoned under these regulations.

All continuous service, whether prior or subsequent to June 1875 (the date from which contributions were first levied), shall count as service for pension or gratuity.

Service before 20 years of age not to count.

19. Periods of service before the age of 20 years shall not count towards pension or gratuity, but this regulation shall not have retrospective effect.

Period of suspension after re-instatement to be in discretion of Commissioner.

20. In case an Officer or Servant shall be suspended pending an enquiry into his conduct and shall thereafter be re-instated, it shall be in the discretion of the Commissioner to determine whether such suspension shall or shall not constitute a break in the service of such Officer or Servant.

Pensions when and how to be paid.

21. Every pension shall be payable monthly if the pensioner resides in India, or quarterly if he resides out of India. Every pension shall be payable to the pensioner in person or, in case of inability on account of illness or absence from Bombay to attend personally, to some person duly empowered either by power-of-attorney or otherwise, as the Commissioner may direct, to received the same. Provided that in the last mentioned case the person so empowered must, on the occasion of each payment, produce and deposit with the Chief Accountant a certificate signed by a Magistrate, Justice of the Peace, or other Official to be approved by the Commissioner, certifying that the pensioner is personally known to him, and was seen by him alive on or after the date on which the pension becomes payable.

COMPASSIONATE ALLOWANCES.

Compassionate allowance to be paid to widow and children, or other relatives of, and dependent on a contributor who has died in Municipal Service.

22. In case an Officer or Servant who is a contributor under these regulations shall die while in the Municipal Service after he shall have completed five years' service a compassionate allowance, not exceeding a gratuity calculated on the basis prescribed by clause (*c*) of regulation 15, shall be paid to or for the benefit of his widow and children, or, in case he shall have left no widow or children, to or for the benefit of his parents, brothers and sisters, if any, if dependent on him for support.

Or of a pensioner who dies before receiving pension for 12 months.

In like manner, in case a pensioner shall die before he shall have received full twelve months' pension, any balance of such pension up to twelve months shall be paid to or for the benefit of his widow and children, or in case he shall have left no widow or children, to or for the benefit of his parents, brothers and sisters, if any, if dependent on him for support.

Provided that nothing in this or any of the foregoing regulations contained shall be deemed to preclude the Corporation in their absolute discretion from granting a compassionate allowance to any Officer or Servant (whether eligible or ineligible to contribute and whether he has contributed or not) who may have been permanently disabled or seriously injured in the discharge of his duties, or to the widow and children, or, in case he shall have left no widow or children, to the parents, brothers and sisters of any of such Officer or Servant who may have been killed in the discharge of his duties.

RULES RELATING TO THE RECEIPT OF GOVERNMENT DUTY AND PRICE OF BÁRÁGRA SALT MANUFACTURED AT THE PRITCHARD SALT WORKS ON THE RUNN OF KUTCH IN THE DISTRICT OF AHMEDABAD.

[c] *Commissioner, C. S. O. and A., Notn. No. 198, dated 12th January 1907, B. G. G., 1907, Pt. I, p. 104.*

In supersession of the rules published under Notification No. 3634, dated the 2nd August 1897, at pages 1431 to 1433 of the *Bombay Government Gazette*, Part I, 1897, the following rules are made and published for general information :—

*Rules relating to the receipt of Government duty and price of Bárágra Salt manufactured at the Pritchard Salt Works on the Runn of Kutch in the district of Ahmedabad of the Bombay Presidency.*

GENERAL.

These rules apply only to Bárágra salt intended to be removed from the Government depôt at Khárághoda in the district of Ahmedabad of the Bombay Presidency to places outside the said Presidency.

2. Section 30 (1) of the Bombay Salt Act II of 1890 provides that "the duty and other charges" (on salt), "if any payable to Government shall be paid to such officer as the Commissioner" (of Customs, Salt, Opium and Abkári, Bombay Presidency) "from time to time directs." With the approval of the Controller General, all Treasury Officers under the Government of India are hereby authorized to receive the duty and other charges on salt intended for removal by rail from Khárághoda to places beyond the frontiers of the Bombay Presidency.

3. The rates of duty and price payable in respect of the salt indented for shall be the rates respectively fixed and in force on the day on which payment is made into any authorized Treasury. The rate of duty is, from time to time, fixed by the Governor General in Council, under Section 7 of Act XII of 1882, and published in the *Gazette of India*. The rate now in force is [a] one rupee [a] for each maund of 82⅔ lbs. avoirdupois weight. The rates of other charges fixed from time to time for Bárágra salt will be communicated to the Treasury Officer concerned by the Collector of Salt Revenue, Bombay. Those now in force are quoted below :—

| | | Per maund. Rs. | a. | p. | |
|---|---|---|---|---|---|
| [b] | Cost price ... | 0 | 2 | 6 | [b] |
| | Sewing charges ... | 0 | 0 | 2 | |
| | Bagging charges ... | 0 | 1 | 7 | |
| | | 0 | 4 | 3 | |

4. Persons indenting for salt may provide their own bags, or if they prefer it, bags will be provided at a fixed charge per maund, which, as noted in the details given in the preceding rule, is [b] one anna seven pies [b].

[a-a] The words "one rupee" were substituted for the words "one rupee eight annas" by Notification No. 1668, dated 12th March 1909, *B. G. G.*, 1909, Pt. I, p. 466.

[b-b] As corrected by Notification No. 1668, dated 12th March 1909, *B. G. G.*, 1909, Pt. I, p. 466.

[c] This Notification has since been amended by Notification No. 1668, dated 12th March 1909, *B. G. G.*, 1909, Pt. I, p. 466, the alterations therein made taking effect from the 1st April 1909—(*vide* paragraph 2 of the same Notification).

The bags provided must be sufficient in number and of uniform size to hold three Indian maunds of salt; they must be legibly and accurately marked and consigned prepaid to the Government Salt Agents, Khárághoda in the Ahmedabad District; they must be sufficiently strong to hold the salt during the journey. The railway receipt for the bags should be sent to the Government Salt Agents separately by post. (*Note.*—One railway wagon carries 309 maunds, in the case of stations on the broad gauge, and 243 maunds in the case of stations on the metre or narrow gauge, and as the Railway Company charge the freight of a full wagon, it is recommended that all applications should be made for one or more full wagon loads.)

PROCEDURE AT THE RECEIVING TREASURY.

5. When a trader wishes to pay money into a Treasury for the purchase of salt from Khárághoda, he should be required to fill in the necessary particulars on a form of indent (Form A attached). The Treasury Officer should give the trader any help that may be required in preparing the indent, and, if necessary, cause the entries to be written for him by one of his clerks, but no fee or other gratification whatsoever may be demanded or accepted, either directly or indirectly, for this service.

*Note.*—The officer in charge of every Treasury that is authorized to receive salt revenue must be careful always to have in stock a sufficient supply of forms of indent and the form should be freely issued to the public on application.

6. If the indent is in order, the trader should be required to pay into the Treasury the amount entered therein. A receipt (Form B attached) should then be prepared, in duplicate, for the money received, and after signature by the Treasury Officer, the original should be returned to the trader and the duplicate filed in the Treasury Office.

7. If the salt revenue is paid into a Sub-Treasury, the amount of each indent should be entered in a separate register (Form C attached), and the total amount received during the day should be credited in the accounts under the head "Bombay Salt Department" (*vide* Article 419 of the Civil Account Code, Volume I), and the Sub-Treasury Officer should submit to the Huzur Treasury Officer with his daily account all the indents received during the day and an extract from the sub-register.

8. On receipt of the daily accounts, indents and extracts from the Sub-Treasuries, the Huzur Treasury Officer should carefully examine them, and if correct, enter them in the sub-register of indents and payments received into the Huzur Treasury, and at the end of the day should forward to the Superintendent, Salt Depot, Khárághoda, Ahmedabad District, Bombay Presidency, all the indents received at the Huzur and Sub-Treasuries, with an extract from the sub-register relating to the indents. The monthly statement in Form 58 referred to in Article 419 of the Civil Account Code, Volume I, should be forwarded to the Chief Account Officer of Customs, Salt and Opium, Bombay.

PROCEDURE TO BE FOLLOWED BY THE SUPERINTENDENT, MAIN SALT STORES, PRITCHARD SALT WORKS, KHA'RA'GHODA.

9. The Superintendent should carefully examine each indent received from the Treasury Officer and satisfy himself that the amount entered therein is correct with reference to the quantity of salt indented for. If he finds that

the amount paid into the Treasury is less than what is due on the salt indented for, he should at once communicate by post the fact to the trader with a view to the recovery of the short payment before the indent is complied with.

10. If the trader has supplied his own bags, and if the Superintendent finds that they are insufficient to hold the quantity of salt indented for, or that all or any of them are not strong enough, he should at once communicate the fact in writing to the trader to the address mentioned in the indent, with an intimation that the issue of the salt will be delayed pending compliance with the requisition for bags.

11. All indents received from Treasury Officers under these rules should be entered in a separate register in Form No. 2 appended to the rules prescribed by the Collector of Salt Revenue [b] for the conduct of business and the accounts at the Pritchard Salt Works and at the Main Stores and Ahmedabad Salt Depôt [b].

[b] * * * * [b]

12. The indents then should be complied with under the ordinary rules, and the railway receipt should be forwarded by post * * [a] to the trader to the address noted on the indent.

13. The Superintendent, Main Salt Stores, Khárágheda, should forward to the Chief Account Officer of Customs, Salt and Opium, Bombay, with his Weekly Cash Account an extract from the register of indents received by him from the Treasury Officers under these rules.

PROCEDURE TO BE FOLLOWED BY THE CHIEF ACCOUNT OFFICER OF CUSTOMS, SALT AND OPIUM, BOMBAY.

14. The Chief Account Officer of Customs, Salt and Opium, Bombay, should carefully compare the weekly returns received from the Superintendent, Main Stores, Khárágheda, with the monthly statements received from the Treasury Officers under rule 8, and any errors or discrepancies discovered should be made the subject of immediate enquiry.

15. The Accountant General, Bombay, will furnish the Chief Account Officer, every month with a consolidated statement, prepared from monthly schedules received from other Accountants General, showing all the amounts brought to credit on his books on account of Khárágheda salt, and the Chief Account Officer will compare it with the detailed accounts received by him under Rule 8.

16. If the Chief Account Officer, on examination of the accounts, finds that any excess payment has been recovered from any trader at any Treasury, he should report the fact to the Accountant General, Bombay, giving particulars as to (a) the name and residence of the trader, (b) the name of the Treasury at which the payment was made, (c) the number and date of the indent, and (d) the amount of excess recovery, in order that the Accountant General may arrange for the refund of the amount through the Treasury Officer concerned.

RULES FOR THE DISPOSAL OF APPLICATIONS FOR PERMISSION TO OPEN NEW SALT WORKS.

(1) *Notn. No. 1733-B, Revenue, dated 5th March 1890, B. G. G., 1890, Pt. I, p. 175.*

The disposal of applications for permission to open new salt works shall, subject to the control vested in the Governor in Council and in the Commissioner by Bombay Acts VII of 1873 and V of 1882, be regulated by the following rules :—

1. All applications for permission to manufacture salt are to be made to the Collector of Salt Revenue.

2. On receipt of any such applications the Collector of Salt Revenue shall in the first place make such enquiry as may be necessary to determine whether manufacture should be allowed or not in the locality referred to in the application. If it shall appear to him that manufacture may be allowed, and if the land be unoccupied, he shall report the result of his enquiry, with his own opinion and the grounds thereof, to the Commissioner of Salt Revenue, and shall, if the Commissioner so directs, apply to the Collector of Land Revenue to have the land placed at his disposal for salt manufacture in accordance with Rule 7 (*b*) of the rules under the Bombay Land Revenue Code.

---

(1) This Notification, issued under Bombay Act VII of 1873, as amended by Bombay Act V of 1882, is kept in force by Bombay Act II of 1890, Section 2.

3. If the Collector of Land Revenue agrees to the appropriation of the land for salt manufacture, the Collector of Salt Revenue shall thereupon have the land surveyed and cause a scheme to be prepared for its conversion into one or more salt works, on such plan and of such dimensions as he may consider most advantageous.

4. The scheme shall embody a plan showing the position, shape and dimensions of the work or works to be constructed, and of pans, reservoirs, banks, storage platforms, channels, paths, &c., the routes by which only the salt is to be removed, the number and description of chaukis and other buildings to be provided by the manufacturer, the contribution to be paid towards cost of additional establishment, the rate of ground-rent to be levied, and all other particulars and conditions which the circumstances of the case may demand or which may from time to time be prescribed.

5. (1) The Collector shall submit the scheme and plan so prepared to the Commissioner.

(2) On receiving from or through the Commissioner instructions as to the scheme and plan finally approved, the Collector of Salt Revenue may proceed to dispose of the right to construct the salt-works and to manufacture salt in accordance with it either to the original applicant, if there be no others, or by inviting tenders, or by auction; or, if there be insufficient competition, may lease the ground for a suitable term of years, on condition that the work constructed thereupon shall revert to Government on the expiry of the lease.

(3) In the event of the Collector desiring to substitute a lease for a term of years instead of putting up to auction the right to manufacture, &c., he shall, before passing orders, submit the matter to the Commissioner, and act in accordance with his directions.

6. The person whose application, tender or bid is accepted, or to whom the ground may be leased, shall be required to conform strictly to the scheme, any departure from which, except with the permission of the Collector in writing under sanction previously obtained from the Commissioner, will entail forfeiture of the permission to manufacture.

7. The Collector of Salt Revenue may, at any time of his own motion under sanction previously obtained from the Commissioner, apply to the Collector of Land Revenue to set apart for salt manufacture any unoccupied and unassessed land which he considers suitable and likely to be required for that purpose, and on the land being set apart may either at once proceed to prepare a scheme and dispose of the right of manufacture or await applications, as may seem most advisable.

8. It is to be distinctly understood that the right to manufacture salt conferred by the Collector of Salt Revenue under the foregoing rules, whether for a term of years or otherwise, will be distinct from the occupancy and includes no proprietary right. On the determination of the right to manufacture, whether by expiry, forfeiture or otherwise, the possession of the ground and of any works constructed on it reverts to Government absolutely.

9. (1) When the application relates to occupied land, the Collector of Salt Revenue, if he considers that manufacture may be allowed, shall inform the applicant of the terms upon which permission will be given, and refer him to the Collector of Land Revenue. On the receipt of an intimation that no

objection to such appropriation exists on the part of the Land Revenue Department, the Collector of Salt Revenue shall, in consultation with the Collector of Land Revenue, consider on which of the alternative conditions mentioned in Rule 7 (*c*) of the Bombay Land Revenue Code Rules the permission to appropriate and the license to manufacture should be granted, and shall submit the result of such consideration to the Commissioner of Customs, Salt, Opium and A'bkári.

(2) If under instructions received from the Commissioner it is decided that the occupancy should be relinquished and that a lease shall be granted in its stead, the Collector of Salt Revenue shall prepare a scheme under Rule 4 of these rules. In any other case the terms on which the license to manufacture salt shall be granted shall be such as may from time to time be prescribed. All decisions under this rule shall, before the application is finally disposed of, be communicated to the applicant, who, if the license to manufacture salt is granted, will be bound by all the conditions so decided on.

A candidate who has been permitted to be examined for a first class certificate of competency under the proviso to rule 50 without first obtaining a second class certificate of competency or a first class certificate of service, and who fails in his examination in practical knowledge, shall not be re-examined for a certificate of the higher grade until he has served twelve months as second engineer with a second class engineer's certificate of competency as required by the rules.

Re-examination on failure.

69. Where the candidate fails in the examination for the lower as well as for the higher grade of certificate, he may be re-examined for a second class certificate only, subject to the provisions of rule 62.

*Postponement of Grant of Certificate in certain cases.*

Short service.

70. (1) If, after a candidate has passed his examination, it is discovered that his services are insufficient to entitle him to a certificate of the grade for which he has passed, such certificate shall not be granted to him; but if the Collector is satisfied that the error in the calculation of his services did not occur through any fault or wilful misrepresentation on the candidate's part, the Collector may direct the certificate to be issued, or may allow the candidate to appear for re-examination without payment of further fee, when he has performed the deficient service.

Service sufficient for a lower grade certificate.

(2) If, in such a case, the applicant's services are sufficient to entitle him to receive a certificate of a lower grade, provided as aforesaid he has not wilfully misrepresented the amount of his services, a certificate of such lower grade may be granted to him, and the difference between the fee paid by him for the superior certificate and the fee payable for the inferior certificate may be refunded.

Re-examination.

(3) In such a case, when the applicant has by further service made up the time in which he was found to be short, he may be required, before he can receive the higher certificate, to be re-examined in all the subjects.

*Surrender of Lower Grade Certificates.*

Holder of lower grade certificate to surrender it before grant of first or second grade certificate.

71. No certificate of the first or second class shall be granted to the holder of a certificate of a lower grade unless and until the holder has surrendered to the Collector the certificate of the lower grade.

## APPENDIX C.

(*See rule 58.*)

*Examination in Rough Working Drawing for a First Class Engineer's Certificate of Competency.*

1. The regulations in regard to the qualifications of a candidate for a First Class Engineer's Certificate of Competency specify that—

"He must be able to make rough working drawings of the different parts of the engines and boilers;

"He must be able to state the general proportions borne by the principal parts of the machinery to each other."

2. In accordance with these clauses a candidate for a first class certificate is required to make a rough working drawing of the parts specified on the other side of this leaf. A mechanic who has been some years in charge of engines and boilers ought by this time to have familiarly in his mind the general construction of at least one set of engines and boilers, say that set he was last with. Fine drawing is not expected, and in the proportions of the parts a wide margin will be allowed; absurd dimensions will be failure in practical knowledge.

---

[a—a] These words were inserted by G. N. No. 3522, General, dated 27th June 1905, *B. G. G.*, 1905, Pt. I, p. 784.

3. The drawing must, however, be practically a working drawing giving a sufficient number of views to show the parts fully —sections, plans, or elevitions, just as the candidate would require to be supplied to him if he had to make the parts to the design of another person.

4. A clear hand sketch showing the construction completely, and fully dimensioned will be accepted if the candidate prefers this alternative.

5. A portion only of the parts specified may be accepted in place of the whole, if that portion is sufficient to show that the candidate has a good partical idea of the construction of the parts, and a fair notion of their general proportions or dimensions.

6. Candidates are hereby cautioned not to put on paper what they have not fully considered, and deliberately intend to be understood, as their statement of what they know about the construction of any part required.

7. The statements given in by a candidate may be in themselves apparently, of little importance, but, as sample material from which the state of the candidate's knowledge of engines and boilers is to be inferred, every detail which is glaringly inconsistent with a sound knowledge of the use of the part, or in which an essential consideration has evidently been overlooked, is an important element in the description which the candidate is giving of his own qualifications.

8. The candidate is advised not to begin more than he can clearly finish in the time allowed. An important object in this part of the examination is to ascertain whether the candidate can be trusted to mark all necessary dimensions upon a sketch or a drawing. The test of this is, practically, the making of the part from the sketch without having to supply additional dimensions, and without measuring the drawing. To prove this ability the candidate must fully dimension the parts shown in his sketch or drawing notwithstanding that the parts may be correctly drawn to scale. A drawing is fully dimensioned when no part of it is left to the option of the party who is to work to the drawing.

9. To prevent misunderstanding, however, when the candidate has been led into showing more of the details than he has time fully to finish, he should name, in the statement on the other side, the particular parts which he has fully dimensioned.

10. All dimensions should have lines and darts to indicate distinctly the points between which the dimensions are given.

11. Beware of writing cross dimensions upon centre lines or upon longitudinal dimension lines. This is not an order but a recommendation.

12. The candidate is not expected to design anything: he has merely to sketch or draw something with which he is expected to be already familiar.

13. Pencil in nothing after 3 o'clock: all the dimensions, the figures and the darts must be inked in; employ the remaining time in examining the drawing and in inking in any figures which may have been before overlooked, and in checking the dimensions.

14. Make sure that you will have sufficient room on the sheet to show all the necessary views. You can have another sheet of paper if necessary. All the paper used must be forwarded with the drawing.

15. Fill in and sign the following statement:-

SUBJECT FOR EXAMINATION IN ROUGH WORKING DRAWING.

(*Read the foregoing General Instructions.*)

A common slide valve with its spindle. Show also an outline section of the parts at the cylinder face. Show the provision for connecting the slide valve to the spindle.

The candidate is requested to fill up the following and to attach this paper to his drawing :—

*Instructions to Engineer Examiners.*

Examiners will require all candidates to fill up a form of which a copy is attached, and they will forward the same to the Collector along with the report of the examination.

For the present the questions for both classes of engineers will be taken from the same book of "Elementary Questions;" and candidates for first class certificates are expected to show their superiority by giving answers more complete than those of the other candidates.

The arithmetical questions for engineers and the *vivâ voce* examinations for all candidates will be continued as heretofore, and failure in the elementary questions will be treated as failure in arithmetic.

The numbers of the questions for each examination are not to be communicated to the candidate until his examination commences.

New editions with alterations will be issued from time to time.

For the questions to be answered see the Book of Elementary Questions. The questions need not be written, only the answers to them.

*Form of Preliminary Questions to be answered by the First Class and Second Class Candidates.*

## PART III.

82. The Rules in this Part may be called the Bombay Rules for determining the duties of Inspectors, 1903.

### INSPECTION OF MATERIAL AND WORKMANSHIP MEASUREMENTS PRIOR TO CALCULATION, &C.

83. Inspectors are required by the Act (see sections 7, 8 and 10) to register boilers, fix the pressure at which they are to be allowed to work, and to grant certificates therefor. (See also rules 94 and 108. See also sections 6 (2) (*e*), 9, 11 and 15 of the Act.)

84. (1) The Inspector shall fix the working pressure for a boiler by making a series of calculations of the strength of the various parts, the calculations being based on his measurements and taking due account, after careful examination, of the material and workmanship, and the details of construction, of each part.

The strength of the weakest part determines the permissible working pressure of the boiler.

In his examination the Inspector may, *if necessary* bore the plates to ascertain their thickness, &c., where the extraction of a rivet or other means will not give the information required.

In all boilers in which the Inspector finds that cast-iron is employed in such a manner as to be subject to the pressure of steam or water, he shall report the circumstances to the Senior Inspector, and shall act in accordance with such instructions as he may receive from him: Provided that the Senior Inspector may by departmental orders authorise Inspectors to omit such reports and exercise their own discretion with regard to fittings of boilers [a] except in the case mentioned in rule 100 A. [a].

(2) In making his calculations the Inspector is to be guided by the formulæ, factors, and constants (corresponding to the ascertained details of the boiler examined) given in the rules for the time being in force (see rule 109).

If no formula, factor, or constant given in the rules is found to correspond to the ascertained details of the boiler examined, the Inspector shall report the matter to the Senior Inspector for his orders.

(3) To ensure the reliability of the results of his examination and calculations the Inspector shall, before granting his certificate, if he considers it necessary or if it is prescribed by rule 105, also hydraulically test the boiler after it has been erected *in situ* (except in the case of boilers examined under the provisions of section 8, sub-section (5) in accordance with the rules for the time being in force regarding such tests.

---

[a-a] These words were added by G. N. No. 452, General, dated 26th January 1909, *B. G. G.*, 1909, Pt. I, p. 154.

85. (1) In the case of boilers made or altered in India, the Boiler Inspection Department may receive, for examination, before the commencement of the work, plans and particulars of the designs or alterations proposed, in order to avoid questions as to design and material arising during the examination of the finished boilers or alterations. All such plans and particulars of boilers for use in Bombay or in the Mofussil shall be submitted, for examination, to the Senior Inspector, and he shall furnish the proposers with his opinion as to whether he is satisfied that the design and dimensions are suitable for the proposed pressure, or, if not, as to what modifications may be necessary therein.

(2) When plans and particulars of boilers, or of proposed alterations, have been so received and approved, the Inspector, in making his examination prior to granting a certificate, shall see that the designs, as approved, have been carefully followed out, and that the materials correspond with the approved particulars furnished, and he shall further carefully examine the workmanship, and hydraulically test the boiler in accordance with the rules in force.

(3) When granting the *first* certificate under the Act in the case of any new boiler made in, and imported from, Europe, the Boiler Inspection Department may receive the certificate of well-known and reliable makers that the boiler has been constructed by them, and hydraulically tested, to comply with the provisions of the inspection rules for the time being in force under the Act. Such certificate shall further specify the tests to which the boiler was subjected, the date on which the test was carried out, the results thereof, and the safe working pressure it is designed to bear, and shall also contain details of the nature and dimensions of the materials of which the boiler is made.

(4) Such certificates must be forwarded to the Senior Inspector in original and he shall exercise his discretion as to the acceptance and reliability in whole or in part of the statements contained therein in respect of any such boiler, and may authorise (in writing) the Inspector, who is to grant the certificate under the Act, to relax his inspection of any such boiler regarding those points on which the Senior Inspector deems it safe to accept the maker's certificate: Provided that no hydraulic test specified in such certificate shall be accepted as sufficient, unless the name of the maker and his number for the boiler and the initials of the Inspector who conducted the test are stamped indelibly on the boiler and correspond with similar references in the test certificate (which must bear the signature and seal of the maker in token of his acceptance thereof), and also provided that the Senior Inspector has carefully satisfied himself by personal inspection or by report of his Deputy that the boiler after erection *in situ* is in as sound a condition as when tested in Europe.

(5) Any relaxation authorised by the Senior Inspector under the above sub-rule 4 does not, however, relieve the Inspector who grants the certificate under the Act from a very careful inspection of all work done on the boiler during the course of its erection *in situ*, nor shall such Inspector omit the hydraulic test prior to granting his certificate unless *specifically* authorised to do so by the Senior Inspector under the provisions above detailed, and further in such event should his inspection convince him that a hydraulic test *in situ* has become absolutely necessary, he shall refer the matter back to the Senior Inspector unless the owner volunteers such a test.

(6) A record of all maker's certificates accepted under the provisions of this rule by the Senior Inspector shall be maintained in the Boiler Inspection Department and, when considered necessary by the Senior Inspector to ensure

the genuineness of such certificate, a reference shall be made by that Department to the makers and the result of such reference shall be recorded, for the information and guidance of Inspectors at the next inspection of the boiler.

86. No Inspector shall grant a certificate for a boiler until he has fully satisfied himself as to its fittings, construction, material, and workmanship, and calculated its safe working pressure in accordance with the rules in force, nor until he has hydraulically tested it when considered necessary or prescribed by the rules.

87. Having regard to many cases in which serious defects have been discovered, Inspectors should take care, in order to ensure proper inspection, that boilers, the whole of the outside of which cannot be readily examined, are cleared whenever they consider it *necessary*, of any concealing covering, supports, or fittings. If the owners in any special case have any good reasons for not wishing to clear them when the Inspector requires it, the Inspector should submit the whole case in detail to the Senior Inspector for his consideration and orders. The Inspector must, however, recollect that he is not to certify as efficient any boiler respecting which he cannot thoroughly satisfy himself. Boilers which have been so cleared should, if the Inspector considers it *necessary*, be subjected to the hydraulic test before the brick work is rebuilt.

Inspectors are also cautioned that a number of cases have occurred in which many screwed steel stays in the water spaces of boilers have broken squarely across in line with the water side of the outer plate in the ordinary course of working. It is sometimes difficult to detect such defects, although they may render the boiler in which they occur quite unfit for the pressure which it would otherwise be capable of bearing. Great vigilance is therefore necessary in the examination of such stays, and Inspectors will find the frequent application of the hydraulic test a valuable aid to the discovery of such broken stays. The surface supported by short-screwed stays should be carefully gauged before, during, and after the hydraulic test, as undue deflection will no doubt occur in the vicinity of any stays that may be broken. It is also desirable that the outer ends of all short-screwed stays should have a small hole drilled axially, of sufficient depth to extend into the body of the stay at least half an inch beyond the plate into which the stay is screwed. If this is done, the breaking of a stay in the above manner will result in slight leakage, and give warning to those in charge. Some makers increase the diameter of the ends of such stays where screwed into the plate above that necessary to meet calculated requirements; this practice is a commendable one, and should be encouraged by Inspectors.

88. Inspectors should record in their inspection books the dates on which boilers are inspected, when and to what extent they have been cleared from brick work or other coverings and whether the boilers were set or not when examined, and if not set, where they were examined.

89. Small boilers must be surveyed and fitted in the same way as large boilers, and must have safety-valves, water-gauges and all other fittings complete; and as regards these fittings, must comply with the same regulations as large boilers.

90. On every inspection of a steam boiler the Inspector shall, if the internal construction and size of the boiler will allow of it, go inside it and make a thorough examination of it.

When the internal construction or size of a boiler will not allow of the Inspector getting inside it, he should act in accordance with the provisions for such cases made under rule 105.

If for special reasons, and for special reasons only, the Inspector cannot go inside a boiler, he shall distinctly state on the face of his certificate his reasons for not being able to do so.

Whenever it is only removable stays that prevent getting in, he must order their removal, and he must see them properly replaced before granting his certificate.

If any part of a boiler near the uptake fire-boxes or furnaces is so constructed, that the Inspector cannot examine it, he is not to give a certificate, but shall report the case to the Senior Inspector for his orders.

If the boiler is too hot for the Inspector to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a certificate, until he can make an efficient internal examination.

91. A pressure once allowed in a boiler is not, *under any circumstances whatever*, to be increased unless the Inspector has previously obtained the sanction of the Senior Inspector, whose reasons for permitting any increase shall be recorded.

In cases where an Inspector is of opinion that an increased pressure may with safety be allowed, he shall communicate with the Inspector who last inspected the boiler, and if on learning the reasons why the existing pressure was formerly allowed, the Inspector is still of opinion that it may be increased, he should communicate all the facts of the case to the Senior Inspector; but *the pressure shall not in any case be increased* until the sanction of the Senior Inspector to do so *has been obtained*.

## Inspection of and Regulations regarding Fittings.

### *The requisite fittings.*

92. (1) Every boiler must be fitted with at least *two safety-valves*, a *glass water-gauge*, a *steam pressure gauge*, at least *two gauge- or test-cocks* or in lieu thereof a second glass water-gauge, a *man-hole* if possible, *a blow-off (or sludge) cock*, a *steam stop-valve*, a *non-return feed valve* on the feed pipe and fitted close to the shell and such *hand-holes* and *mud-holes* as are necessary for effectively cleaning out the boiler. It is also recommended that the boiler should be provided with a *scum-cock* (especially with foul feed-water or feed-water heated by exhaust steam), a *water stop-valve* on the feed pipe, and a fusible plug.

(2) If two or more boilers are connected, each boiler must be fitted complete with all the above fittings as if it were an entirely separate boiler, and a *water stop-valve* to *each* boiler is also then essential, and may be fitted either between the *non-return feed valve* and boiler, or immediately outside this valve, but it is necessary that one or the other of these valves be fitted direct on the boiler flange; a valve combining the offices of these two valves in one casting is allowable.

(3) No boiler, or steam chamber, is to be so constructed, fitted, or arranged that the escape of steam from it through the safety-valves can be

wholly, or partially intercepted by the action of any other valve, or constructive detail.

*Safety-valves.*

93. The Inspector, in his examination of a boiler and its appurtenances, is particularly to direct his attention to the safety-valves and should at every inspection satisfy himself that they are in good working order, and if he has any doubts as to the pressure on them he should see them tried under steam and satisfy himself that they blow off properly at the pressure assigned to them, such steam test being *insisted* on before granting the *first* certificate under the Act for the boiler and on all occasions when the pressure is altered.

When carrying out such tests, Inspectors are to use pressure gauges supplied by the Boiler Inspection Department similar to those supplied for the same purpose by the Board of Trade in England.

94. The Inspector shall declare the limits of the resistance to steam pressure to which the safety-valves may be regulated.

When the Inspector has determined the amount of pressure, he is to order the valves to be weighted accordingly and the weights or springs to be fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure, and if considered necessary he is to see this order carried out. The Inspector shall certify that the valves have been ordered to be so regulated, stating the pressure and weights, and further that their condition is as required by the rules in force. This declaration shall be entered on his certificate issued under the Act.

The responsibility incurred by an Inspector in issuing a certificate before he is fully satisfied, on these points is very grave, since by the law he is responsible for certifying that the boiler (as shown in his statement) with all its necessary appurtenances is to the best of his judgment in good condition.

Should it at any time come to an Inspector's knowledge that the weights have been shifted, or the loading of the valves otherwise altered, or that the valves or constructive details have been in any way interfered with so as to increase the pressure without the sanction of the Senior Inspector he is at once to report the facts to that officer. The Inspector is to examine the whole of the valves, weights and springs at every inspection and satisfy himself that they are correct and in good order.

95. Inspectors must see that in all *new boilers, and in others whenever alterations can be easily made*, the safety-valves are placed directly on the boiler, and the *neck* (or part between the valve and the boiler flange and which is bolted on to the boiler flange) should be as short as possible.

Inspectors should note that by the above instruction it is not intended that old boilers which have been previously passed without such an arrangement, should be thrown out of work for alterations to be carried out. In any such case, however, in which an Inspector is of opinion that it is positively dangerous to continue to have a length of pipe between a boiler and its safety-valve, it is his duty at once to insist on the requisite alterations being made before granting a further certificate under the Act.

96. The combined area* per square foot of fire grate surface of the safety-valves should be not less than that given in the following table

* *Note.*—This area should be that on which the steam pressure in the boiler can exert an active opening pressure when the valves are closed. A similar definition of valve area is to be allowed when calculating the permissible loading of any particular valve.

opposite the sanctioned boiler pressure; *provided that the valves shall be* not less than two inches in diameter. This applies to new boilers and to boilers which have not previously received a certificate under the Act. In ascertaining the fire grate area the average length of the grate should be taken [measured from the inner edge of the dead plate to the front of the bridge] and the average width [from side to side of the furnace on the top of the bars].

In the case of small boilers, if it is wished to fit valves of less than two inches diameter, the case should be submitted for the consideration and orders of the Senior Inspector.

*If there is only one safety-valve on a boiler, the Inspector should not grant a certificate.*

97. Care should be taken that each safety-valve has a lift equal to at least one-fourth its diameter; and that the openings for the passage of steam [to and from the valves], as also the waste steam pipe, should each have an effective área of discharge not less than the area or combined area of the valve or *valves* they serve; and where there is a length of waste steam pipe above a valve-box sufficient to enable an appreciable pressure to be exerted on the top of the valve by condensed steam, rain-water, or other cause, a drain pipe must be fitted at the bottom of the waste steam pipe.

In the case of lever valves, if the lever is not bushed with brass, the pins must be of brass; *iron and iron working together must not be passed.*

Too much care cannot be devoted to seeing that there is proper lift, and free means of escape of waste steam, as it is obvious that unless the lift and means for escape of waste steam are ample the effect is the same as reducing the area of the valve or putting on an extra load.

It is recommended when practicable that the valve seats should be secured by studs and nuts.

*Glass Water-gauge and gauge-cocks.*

98. Inspectors shall see that the bottom fitting of the glass water-gauge, and the lowest gauge-cock, are fixed at a safe level.

At every inspection the Inspector shall see that these fittings are in working order.

*Man-holes, other openings, flat surfaces, uptakes, etc.*

99. All man-holes, and openings of 20 square inches area or over must be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. Openings in the shells of cylindrical boilers when oval should have their shorter axis placed longitudinally. It is very desirable that the compensating rings round openings in flat surfaces be made of L or T iron.

Cast-iron doors are not to be passed.

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions.

The flat ends, &c. (especially when they are of steel) of all boilers, as far as the steam space extends, should be fitted with shield, or baffle, plates where exposed to the hot gases in the uptake.

*Blow-off (or sludge) cock, hand-holes and mud-holes.*

100. At every inspection Inspectors should see that *these fittings are in order.*

[a] 100A. In the case of boilers working at a pressure exceeding 160 lbs. per square inch in respect of which a certificate has not been granted before the 1st day of February 1910, the connecting pipe (if any) between the shell of the boiler and the blow-off cock shall not be made of cast-iron. [a]

[a—a] This rule was inserted by Government Notification No. 452, General, dated 20th January 1909, *B. G. G.*, 1909, Pt. I, p. 154.

*Steam and water stop-valves and steam-pipes.*

101. A steam stop-valve must always be fitted between the boiler and the steam-pipe; and, where two or more boilers are connected with a steam-receiver or superheater, between each boiler and the steam-receiver or superheater. The object of this is obvious, *viz.*, to avoid the failure of all the boilers through the failure of one.

Similarly where two or more boilers are connected, a water stop-valve must be fitted to *each* boiler to enable its isolation for inspection or repairs.

Inspectors shall also see that the regulations in rule 95, respecting 'necks' of safety-valves, are also observed in connection with the 'necks' of steam stop-valves, which valves should be as close on to the boiler as possible.

Inspectors shall also see at each inspection that the non-return feed valves of boilers are in working order.

In all cases in which a socket expansion joint is fitted to a bent steam-pipe, the Inspector should require a fixed gland and bolts to be fitted, in order to prevent the end of the pipe being forced out of the socket. Fixed glands, and bolts should also be fitted to the expansion joints of straight steam-pipes, as cases have occurred, particularly with small straight pipes, in which the ends of the pipes have been forced out of the sockets.

Inspectors should also pay particular attention to the examination (and testing when they may deem it necessary) of steam-pipes.

*The fusible-plug.*

102. Inspectors should see that this plug where provided is at that part of the boiler where the heat of the fire produces the greatest effect.

*Steam pressure-gauge.*

103. Inspectors should frequently examine these at their inspections, to see that their readings are reliable and that safety-valves are not over-weighted to comply with the readings of incorrect pressure-gauges.

See also rule 93 as regards standard gauges to be used in tests.

*Economisers and superheaters.*

104. Inspectors should see that the safety-valves of economisers and superheaters are in proper working order.

REGULATIONS FOR TESTING BOILERS.

105. All hydraulic tests [except those of boilers examined under the provisions of section 8, sub-section (5)] shall be conducted only after the erection of the boiler *in situ*, but, except as provided for in the second clause of this rule, the setting of a boiler need not be disturbed for the purposes of a hydraulic test unless the Senior Inspector from personal inspection or report of his Deputy considers it essential.

Before granting a certificate Inspectors shall see that all boilers which have not previously had a working certificate under the Act [except such as may be exempted under rule 85, sub-rule (4)], boilers that have been cleared for a thorough repair, and all boilers under examination for a certificate after re-erection [except in the case of boilers examined under the provisions of section 8, sub-section (5)] in a position different to that under which they pre-

viously obtained a certificate, are tested by hydraulic pressure (in accordance with rule 107) previous to the boilers being set and before they are covered in, to test the workmanship, &c.

When the internal construction or size of a boiler will not allow of the Inspector getting inside it, he should see it tested by hydraulic pressure at every certificate inspection at least.

Such boilers should have their lagging removed at the first certificate inspection, unless exempted under rule 85, sub-rule (4). Usually the lagging need not be removed on the second, third and fourth, sixth and seventh and ninth annual inspections, provided no leakage occurs during the hydraulic test, but at all other annual inspections the lagging should be completely removed. This procedure may, however, be departed from at the discretion of the Senior Inspector, to whom each case should be referred before any departure is made.

A hydraulic test should also be made before granting an increased pressure certificate.

In all other cases the Inspector shall exercise his discretion as to the necessity for a hydraulic test before granting a certificate, and he may [under the limitations of rule 85, sub-rule (4)] if he considers it *necessary* also apply the hydraulic test to any boiler at any inspection.

When carrying out hydraulic tests, Inspectors are to use pressure-gauges supplied by the Boiler Inspection Department similar to those supplied for the same purpose by the Board of Trade in England. These tests should always be accompanied by careful sets of gaugings and measurements taken before, during, and after the test to ascertain the amount of bulging, and also the permanent set, if any. The tests should not consist of a mere pumping up of the pressure. See also rule 87.

106. Before testing a boiler the Inspector shall examine it, take the necessary measurements and calculate what *the working pressure* should be (in accordance with the regulations in force), and only test it with reference to *that pressure* in accordance with rule 107. If the test is not satisfactory, the working pressure allowable by calculation must be suitably reduced, unless the owner is willing to make such alterations as will enable the boiler to satisfactorily stand the hydraulic test, when, after alteration, the boiler must be again examined, the pressure being re-calculated (if necessary), and tested to the satisfaction of the Inspector.

The Inspector who determines the pressure must examine the boilers thoroughly during the test, specially with regard to any doubtful detail or place not easy of access during the prior examination, for in the absence of special inspections from the Senior Inspector he will be held responsible for the pressure allowed.

No Inspector, who has not after the application of the hydraulic test been able to examine, or who has not examined, the boiler inside and outside, shall be competent to determine the allowable working pressure of such boiler for the purpose of granting the certificate; but when any Inspector who, after such complete examination as is above prescribed has determined the working pressure, is replaced or succeeded by another Inspector, he may record in writing his decision as to the amount of such pressure allowable, and such decision shall be communicated to the makers, owners or Agents concerned and to his successor, who may then proceed to grant the certificate in respect of such boiler, as if the determination of working pressure had been made by

himself. In the event of the original Inspector having had no opportunity to examine the boiler inside and outside after the hydraulic test, the Inspector granting the certificate must re-test the boiler hydraulically and examine the boiler inside and out before determining the working pressure and granting a certificate.

107. *New boilers* are to be tested by hydraulic pressure according to the following rules :—

(i) Boilers intended to work up to *100 lbs. pressure per square inch, or any pressure below that* are to be tested to *double the working pressure.* Care must be taken, however, that the pressure is not allowed to go above this limit, nor must it be maintained longer than is necessary for a satisfactory test.

(ii) Boilers intended for working pressures *above 100 lbs. per square inch* to be tested to *not less than 100 lbs. above such working pressure.*

In the case of *old boilers,* the Inspector must use his own judgment as to the necessary pressure to be applied, care being taken not to overstrain them, *but the test must always exceed the working pressure.*

108. The amount of the hydraulic pressure, date of test, and the amount to, and the date on, which it was *last* applied to the boiler, should be inserted in the Inspector's certificate (in the 'remarks' column) and recorded in the dimension sheet of the boiler.

---

## FORMULÆ, FACTORS, AND CONSTANTS FOR CALCULATIONS.

### *General.*

109. An Inspector, in making his calculation prior to granting a certificate under the Act, shall be guided in so doing by the following formulæ, factors, and constants appropriate to the several parts [refer also to rule 84, sub-rule *(2)*].

### *Shell plates and joints.*

110. *Factors of safety for shell plates and rivet sections.*

Boilers well designed, well constructed and made of good material should have an advantage in the matter of determining the working pressure over boilers inferior in any of the above respects, as, unless this is done, the superior boiler is placed at a disadvantage, and good workmanship and material will be discouraged. The following rules are, therefore, prescribed :—

When cylindrical boilers are made *of the best material,* with all *rivet holes drilled in place* (see note 1) *and all the seams fitted with double butt straps* and double riveted* (see note 2), *and provided that the boilers have been open to inspection by an Inspector under the Act during the whole period of construction* (see item L in list of addenda following), *then 5 may be used as the factor of safety* in calculations of shell plate strength of *iron boilers* and in calculating strength of *iron rivet sections* and 4·5 in the case of *steel boilers* and *steel rivet sections.*

---

* When full allowance is wished for *lap* joints in the longitudinal seams of cylindrical boilers the rivet section, if iron, should be at least $\frac{13}{8}$ times the net plate section, and if steel rivets are used, their section should be at least $\frac{28}{33}$ of the net section of the plate and the tensile strength of the rivet materials not less than 27 tons nor more than 32 tons per square inch. In calculating the safe working pressure, the percentage strength of the rivets may be found in the usual way (by the rules in the appendix), but with iron rivets the percentages so found should be divided by $\frac{13}{8}$ and with steel rivets by $\frac{28}{33}$, the results being the percentages adopted in the calculations.

But when any of the above conditions are not complied with the addenda shown in the following table must be added to the standard factors (5 or 4·5 as the case may be) according to the circumstances of each case in considering the strength of *shell plates.*

| Weakening cause. | Addenda. | | Instructions. |
|---|---|---|---|
| Rivet holes in longitudinal seams. | A | ·15 | To be added when all the holes *are fair and good, but drilled out of place after bending.* |
| | B | ·3 | Do. do. but drilled out of place *before* bending. |
| | C | ·3 | Do. do. but *punched* out of place *after* bending. |
| | D | ·5 | Do. do. but *punched* out of place *before* bending. |
| | E | ·75 | To be added to any of the above items when all the holes *are not fair and good.* |
| Rivet holes in circumferential seams. | | ·1 | To be added when all the holes *are fair and good, but drilled out of place after bending.* |
| | G | ·15 | Do. do. but drilled out of place *before* bending. |
| | H | ·15 | Do. do. but *punched* out of place *after* bending. |
| | I | ·2 | Do. do. but *punched* out of place *before* bending. |
| | J | ·2 | To be added to any of the four preceding items when all the holes *are not fair and good.* |
| Rivet holes ... | K | ... | When rivet holes of any of the above descriptions have been rimered fair, or bored out fair, *in place,* the case should be submitted to the Senior Inspector as to the reduction or omission of any addenda A to D or F to I, as the case may be, which would otherwise be imposed. |

(See note 3.) |

*Note 1.*—Plates that are drilled in place must have been taken apart and the burr taken off and the holes slightly countersunk from the outside.

*Note 2.*—The shear allowance for double riveting must not be taken more than 75 per cent. greater than for single shear. Butt straps must have been cut from plates and not from bars, and must be of as good a quality as the shell plates, and for the longitudinal seams must be cut across the fibre. In double butt straps each strap must be of at least five-eighths the thickness of the plates they cover. The rivet holes may have been punched or drilled when the plates are punched or drilled out of place, but when drilled in place must have been taken apart and the burr taken off and slightly countersunk from the outside. Single butt straps should be at least one-eighth thicker than the plates they cover.

*Note 3.*—The diameter of the rivets should in no case be less than the thickness of the plates of which the shell is made, but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates. Formulæ for diameter and pitch of rivets, etc., will be found in the appendix.

Further more it is bad workmanship if punched steel boiler plates of and exceeding ½ inch in thickness are not annealed or the holes rimered, after punching. Steel plates over ¾ inch thick should always be drilled. Also all steel plates that have been flanged, or locally heated, and all steel stays and stay tubes which have been locally heated should be carefully annealed after being so treated. Steel plates which have been welded should not be passed if subject to a tensile stress, and these welded, and subject to a compressive stress should be efficiently annealed.

If the conditions enumerated in notes 1, 2 and 3 above are not complied with, the Senior Inspector will exercise his discretion as to an addendum under item Z.

### 111. *Ultimate tensile or breaking strength of shell plates.*

#### *(a) Iron boilers.*

In cases where the Inspector is satisfied, from tests made on the iron from which the boiler shell-plates are made, that it is of a certain ultimate tensile strength per square inch, that strength may be adopted in his calculations; but in no case is a greater tensile strength than 23 tons (say 51,500 lbs.) per square inch with the grain to be adopted. In other cases, provided the Inspector is satisfied that the boiler shell is of good ordinary W. I. boiler-plate, a tensile strength of 21 tons (say 47,000 lbs.) per square inch with the grain

and of 18 tons (say 40,300 lbs.) per square inch across the grain may be adopted.

Before, however, accepting, as the result of tests, the ultimate tensile strength of any iron plates, the Inspector must also satisfy himself as regards the general quality of the iron from tests for elongation, bending, and tempering. The test strips should be 2 inches wide and 10 inches long and when practicable they should be cut from the plate by a planing or shaping machine. The elongation should be not less than 14 per cent. with, or 8 per cent. across, the grain. Bending tests should be done cold.

*(b) Steel boilers.*

In cases where the Inspector is satisfied, from tests made on the steel from which the boiler shell plates are made, that it is of a certain ultimate tensile strength per square inch, that strength may be adopted in his calculations; but in no case is a greater strength than 32 tons (say 71,700 lbs.) per square inch to be adopted nor should steel of less than 27 tons (say 60,500 lbs.) per square inch tensile strength be allowed in boiler work. In other cases, provided there is sufficient proof that the boiler is of good ordinary steel boiler-plate, a strength of 28 tons (say 62,700 lbs.) may be adopted.

Before, however, accepting, as the result of tests, the ultimate tensile strength of any steel plates, the Inspector must also satisfy himself as regards the general quality of the steel from tests for elongation, bending and tempering. The tests strips should be 2 inches wide and 10 inches long, and when practicable they should be cut from the plate by a planing or shaping machine. The elongation should be about 25 per cent., and not less than 18 per cent., when the strips are tested in the normal condition, but if the plates are annealed by heating in a plate furnace and then cooled on the mill floor, the elongation should not be less than 20 per cent. Bending tests should be done cold.

112. *Ultimate or breaking strength of rivets.*

As with boiler-plates in rule III so with rivets if the Inspector is satisfied from tests made on the material of which the rivets are made that it is of a certain ultimate strength, that strength may be adopted in his calculations. If only tensile tests are available the shearing strength may be taken as four-fifths of the tensile strength. The maximum limits of ultimate shearing strength of rivet material which may be adopted, however, are 22 tons (say 49,300 lbs.) per square inch for *iron rivets*, and 25 tons (say 56,000 lbs.) per square inch for *steel rivets*. Steel rivet material should also be tested for elongation (which should be about 25 per cent. in a length of 10 inches) and for contraction (which should be about 60 per cent.). In other cases, provided the Inspector is satisfied that the rivets are of good ordinary rivet materials, a shearing strength of 21 tons (say 47,000 lbs.) per square inch for *iron rivets*, and of 23 tons (say 51,500 lbs.) per square inch for *steel rivets*, may be adopted.

113. *Formulæ for calculation of shell strength.*

The formulæ will be found in the appendix to these rules.

*Flat surfaces, curved ends, stays, and tube plates.*

114. *Formulæ for calculations for flat surfaces, curved ends, and stays:*

(*i*) FLAT SURFACES.

*(a) Iron Boilers.*

The pressure on plates forming flat surfaces is found by the following formula:

$$\frac{C \times (T + 1)^2}{S - 6} = \text{Working pressure, in lbs. per square inch.}$$

T = Thickness of the plate, in sixteenths of an inch.

S = Surface supported by one stay, in square inches.

C = Constant according to the following circumstances:

When the plates are *not* exposed to the impact of heat or flame.

C = 100 if the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stays and two-thirds the thickness of the plate they cover.

C = 150 if washers are riveted and the diameter at least two-thirds the pitch of the stays, and the thickness not less than the plates they cover.

C = 160 if doubling strips are fitted of the same thickness as the plates they cover and not less in width than two-thirds the pitch of the stays.

When doubling plates cover the whole of flat surface, the case should be submitted for the consideration of the Senior Inspector.

C = 90 if the stays are fitted with nuts only.

C = 67½ if the stays are screwed into the plates and riveted over.

When the plates *are* exposed to the impact of heat or flame, with *steam* in contact with the plates.

C = 60 if the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of plates they cover.

C = 54 if the stays are fitted with nuts only.

C = 36 if the stays are screwed into the plates, and have the ends riveted over to form substantial heads.

When the plates *are* exposed to the impact of heat or flame, with *water* in contact with the plates.

C = 80 if the stays are screwed into the plates and fitted with nuts.

C = 60 if the stays are screwed into the plates, and have the ends riveted over to form substantial heads.

In cases where plates are stiffened by T or L iron, and a greater pressure is required for the plates than is allowed by the use of the above constants, the case should be submitted for the consideration of the Senior Inspector.

When the riveted ends of screwed stays are much worn or when the nuts are burned, the constants should be reduced, but the Inspector must act according to the circumstances that present themselves at the time of inspection, and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state, it will be often necessary to reduce the constant 60 to about 36.

When an unstayed circular flat end is bolted or riveted to a cylindrical shell, S in the formula may be taken as the area of the square inscribed in the circle passing through the centres of the bolts or rivets securing the end, provided the angle ring or flange is of sufficient thickness.

In the case of flat surfaces of irregular form where the staying is continuous, and with stays secured by rivets, or with nuts and washers, *as in the end plates of Lancashire and Cornish boilers*, the working pressure may be as follows:

$$\frac{220 \times (T + 1)^2}{d^2 - 12} = \text{Working pressure, in lbs. per square inch.}$$

T = Thickness of end plate, in sixteenths of an inch.

d = Diameter in inches of the largest circle that can be inscribed in the *unstayed area*.

A deduction of 12 per cent. from the allowable pressure should be made for parts exposed to heat and flame.

For flat circular surfaces, such as dome tops, double the above pressure may be allowed.

(*b*) *Steel boilers.*

Provided the quality of the steel complies with the conditions prescribed for furnace plates [see rule 35 (*b*)] for steel boilers the rules for iron boilers may be increased as follows:—

The constants for flat surfaces when they are supported by stays screwed into the plate and *riveted* over so as to form substantial heads, 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and *nutted*, or when the stays are nutted in the *steam* space, 25 per cent. This is also applicable to the constants for flat surfaces stiffened by riveted washers or doubling strips, and supported by nutted stays.

In the case of flat surfaces of irregular form the working pressure given by the formula above for similar surfaces of iron boilers may be increased 16 per cent., a deduction from this increased pressure of 12 per cent. for exposure to heat and flame being, however, made where necessary as in the case of iron boilers.

(*ii*) CURVED ENDS.

(*a*) *Iron boilers.*

The safe working pressure for dished ends may be found from the following formula:—

$$\frac{4\ T\ hs}{R^2 + h^2} = \text{Working pressure, in lbs. per square inch.}$$

T = Thickness of end plate, in inches.

h = Camber of end plate, in inches.

s = Safe stress, in lbs. per square inch of section, for material of end plate.

R = Radius, in inches, of circular (flange) base.

And for a hemispherical end—

$$\frac{2\,T\,s}{R} = \text{Working pressure, in lbs. per square inch.}$$

s—for hemispherical ends may be taken the same as for iron shell plates (ultimate tensile strength divided by factor of safety suitable to the conditions), but for dished ends should not exceed 5,000 in tension, or 3,000 in compression, and to avoid grooving the flange base should be well rounded at the bend.

(*b*) *Steel boilers.*

s—in the above formula may, for hemispherical ends, be taken the same as for steel shell plates (ultimate tensile strength divided by factors of safety suitable to the conditions), but for dished ends should not exceed 6,500.

(*iii*) STAYS.

(*a*) *Iron work.*

The requisite size of stay bars supporting flat surfaces may be calculated from the following formula :—

$$d = K \sqrt{P\,A}.$$

d = Least *net* diameter of stay, in inches.

P = Working pressure, in lbs. per square inch.

A = Area supported by one stay, in square inches.

K = A variable factor derived from the table given below, where S = safe stress allowed in stay, in lbs. per square inch.

| S = ... | 4500. | 5000. | 5500. | 6000. | 6500. | 7000. | 7500. | 8000. | 8500. | 9000. |
|---|---|---|---|---|---|---|---|---|---|---|
| K = ... | ·0168 | ·0160 | ·0152 | ·0146 | ·0140 | ·0135 | ·0130 | ·0126 | ·0122 | ·0119 |

The following are some of the values which may be assigned to S :

S = 5000 on solid screwed stays when they have been welded or worked in the fire.

S = 6000 on the net section of stay tubes, provided that the net thickness is in no case less than ¼ inch.

S = 7000 on solid screwed stays of new boilers which have *not* been welded or worked in the fire.

When the threads of screwed stays are fine the depths of the nuts should be at least 1¼ times the diameter.

The area of *diagonal* stays may be found in the following way: find the area of a direct stay needed to support the surface, multiply this area by the length of the diagonal stay, and divide the product by the length of the perpendicular from the end of the diagonal stay to the surface supported; the quotient will be the area of the diagonal stay required.

The ends of diagonal stays should not be bent, but should be attached with bevelled washers under the nuts, or they may be attached to the shells by a riveted palm.

The area of *gusset* stays should be in excess of that found in the manner indicated above for diagonal stays.

The working tensile stress of *gusset* stays may be found as follows:—

$$\text{Working stress, in lbs. per square inch} = \frac{\text{Area of surface supported, in square inches} \times \text{working pressure, in lbs. per square inch.}}{\text{Depth of web at narrowest part, in inches} \times \text{thickness of web, in inches.}}$$

*Note.*—Dished ends, unless of the thickness required for a flat end, must be stayed. When dished ends are theoretically equal to the pressure needed, when considered as portions of spheres, the stays when solid may have a stress of 14,000 lbs. per square inch of net section (but the stress should not exceed 10,000 lbs. when the stays have been welded or worked in the fire), and such stays should be properly distributed. If dished ends are not theoretically equal to the pressure needed, they should be stayed as flat surfaces.

(*b*) *Steel Work.*

Provided the tensile strength of the stay bars is from 27 to 32 tons per square inch, with an elongation of about 25 per cent. and not less than 20 per cent. in a length of 10 inches; *solid steel screwed stays which have not been welded or otherwise worked after heating* may be allowed a working stress of 9,000 lbs. per square inch of net section.

For supporting dished ends which are found to be theoretically equal to the pressure needed, *solid steel stays* may, however, have a stress of 18,000 lbs. per square inch of net section.

Provided the tensile strength of strips to form stay tubes is from 26 to 30 tons per square inch, with an elongation of about 25 per cent. but not less than 20 per cent. in a length of 10 inches; *stay tubes of steel* may be allowed a stress not exceeding 7,500 lbs. per square inch of net section so long as their net thickness is in no case less than $\frac{1}{4}$ inch.

*Steel stays which have been welded or worked in the fire have been found to be unreliable, therefore they should not be passed* (this does not, however, apply to stay tubes which are welded longitudinally).

115. *Formulæ for calculation for tube plates.*

(*a*) *Iron Work.*

The Inspector should not in any case allow a greater compressive stress on the tube plates, due to the pressure on the crown of the fire-box, than 9,000 lbs. per square inch, which is that used in the following formula:—

$$\frac{(D-d)\,T \times 1{,}800}{W \times D} = \text{Working pressure, in lbs. per square inch.}$$

D = Least horizontal distance between centres of tubes, in inches.

d = Inside diameter of ordinary tubes, in inches.

T = Thickness of tube plate, in inches.

W = Extreme width of combustion box, in inches, from front of tube plate to back of fire-box, or distance between combustion box tube plates when the boiler is double-ended and the box common to the furnaces at both ends.

(*b*) *Steel Work.*

Provided the quality of the steel complies with the conditions prescribed for furnace plates [see rule 35 (*b*)], the compressive stress may be increased to 11,200 lbs. per square inch, *i.e.*, instead of 18,000 use 22,400 in the formula for iron boilers given above.

*Girder Supports.*

116. *Formulæ for calculations for supporting-girders.*

(*a*) *Iron Work.*

When the tops of combustion boxes, or other parts of a boiler, are supported by solid girders of rectangular section, the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam, *and in the case of combustion chambers that the ends are properly fitted to the edges of the tube plate and the back plate of the combustion box.*

$$\frac{C \times d^2 \times T}{(W-P)\ D \times L} = \text{Working pressure, in lbs. per square inch.}$$

W = Inside width of combustion box, in inches, between the sides supporting the girder.

P = Pitch of supporting bolts, in inches.

D = Distance between the girders from centre to centre, in inches.

L = Length of girder, in feet, over all.*

d = Depth of girder, in inches.

T = Thickness of girder, in inches.

N = Number of supporting bolts.

$$C = \frac{N \times 1{,}000}{N + 1} \text{ when the number of bolts is odd.}$$

$$C = \frac{(N + 1)\ 1{,}000}{N + 2} \text{ when the number of bolts is even.}$$

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays and plates.

(*b*) *Steel Work.*

The constants for combustion box supporting girders should be increased 10 per cent., provided that the tensile strength of the steel is from 27 to 32 tons per square inch with an elongation of about 25 per cent. and not less than 20 per cent. in a length of 10 inches.

---

* This must in no case be less than W.

If length is equal to outside width of combustion box then 1,000 in the values for the constant C shown above may be increased to 1,050.

*Circular Furnaces.*

117. *Plain Furnaces.*

(*a*) *Iron Work.*

Circular furnaces with the longitudinal joints welded, or made with a butt strap double riveted, or double butt straps single riveted,

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches}}{(\text{Length in feet} + 1) \times \text{diameter in inches}} = \text{Working pressure, in lbs. per square inch.}$$

Provided it does not exceed that found by the following limiting formula :

$$\frac{9{,}000 \times \text{thickness in inches}}{\text{diameter in inches}} = \text{Working pressure, in lbs. per square inch.}$$

The second formula limits the crushing stress on the material to 4,500 lbs. per square inch.

The length to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap-jointed in the ordinary way and double riveted, then 75,000 is to be used instead of 90,000, excepting only where the lap is bevelled, and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above must be suitably reduced ; when neither the material nor the workmanship is of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Inspector, as in the case of old boilers. One of the conditions of best workmanship is that the joints are double riveted with single butt straps or single riveted with double butt straps, and the holes drilled after the bending is done, and when in place, and the plates afterwards taken apart, the burr on the holes taken off and the holes slightly countersunk from the outside.

The following examples will serve to show the application of the constants for the different cases that may arise :—

| | | | | |
|---|---|---|---|---|
| Furnaces with butt joints and drilled rivet holes. | 90,000 | where the longitudinal seams are welded. | | |
| | 90,000 | do. | do. | double riveted and fitted with single butt straps. |
| | 80,000 | do. | do. | single riveted and fitted with single butt straps. |
| | 90,000 | do. | do. | single riveted and fitted with double butt straps. |
| Furnaces with butt joints and punched rivet holes. | 85,000 | where the longitudinal seams are double riveted and fitted with single butt straps. | | |
| | 75,000 | do. | do. | single riveted and fitted with single butt straps, |
| | 85,000 | do. | do. | single riveted and fitted with double butt straps. |
| Furnaces with lapped joints and drilled rivet holes. | 80,000 | where the longitudinal seams are double riveted and bevelled. | | |
| | 75,000 | do. | do. | double riveted and not bevelled. |
| | 70,000 | do. | do. | single riveted and bevelled. |
| | 65,000 | do. | do. | single riveted and not bevelled. |
| Furnaces with lapped joints and punched rivet holes. | 75,000 | where the longitudinal seams are double riveted and bevelled. | | |
| | 70,000 | do. | do. | double riveted and not bevelled. |
| | 65,000 | do. | do. | single riveted and bevelled. |
| | 60,000 | do | do. | single riveted and not bevelled. |

(*b*) *Steel Work.*

The above constants should be increased 10 per cent., provided the tensile strength of the furnace and combustion box plates is from 26 to 30 tons per square inch and that strips 2 inches wide and 10 inches long cut from the plates will (when heated to cherry red, plunged into water at about 80° and kept there till of the same temperature as the water), bend till the sides are parallel at the distance from each other of not more than three times the thickness of the plates.

118. *Upright fire-boxes, and uptakes of vertical boilers.*

In the case of upright fire-boxes, of donkey or similar boilers, the following percentages should be deducted from the constants given above for plain furnaces, applicable to the respective classes of work, *viz* :—

10 per cent. where the diameter of fire-box decreases at least 1 inch per foot of height;

15 per cent. were the diameter does not decrease;

And percentages intermediate to the above for intermediate coneing.

Proper provision should be made for expansion in the boiler, and fire-boxes should be welded longitudinally.

As the uptakes of hay stack and similar type boilers (including ordinary vertical donkey boilers) where they pass from the fire-box through the steam space are especially liable to injury from overheating, unless careful precautions are taken while steam is being raised, their working pressure should be ascertained by the rules given above for plain circular furnaces (iron or steel), but the corresponding constants used in the calculations should be reduced as 47 to 30, and if flaming coal is regularly used in the furnace the reduction should be as 47 to 22·5.

Makers and owners should, however, be persuaded as far as possible to make the strength of the uptakes in excess of that given by the above rules.

Hoops riveted round can be employed to increase the resistance of the uptake tubes against collapse, but bowling rings (which strengthen while allowing for expansion) are preferable. The use of bowling rings with a moderate thickness of plate is better than very thick plating.

Uptake tubes should preferably be welded, not riveted.

It is also recommended that the uptake should be protected by a cast-iron liner with an air space all round it, or saved from being unduly heated by other efficient means.

The area of uptakes should be about 1/12 to 1/14 of the fire grate area.

119. *Furnaces with anti-collapse rings.*

(*a*) *Iron Work.*

(i) When horizontal furnaces of ordinary diameter are constructed of a series of rings welded longitudinally, and the ends of each ring flanged, and the rings riveted together, and so forming the furnace, the working pressure is found by the following formula, provided the length in inches between the centres of the flanges of the rings is not greater than (120 T—12), and the

flanging is performed at one heat by a suitable flanging machine, *and also the conditions which follow the formula are complied with*:

$$\frac{9{,}000 \times T}{3 \times D}\left(5 - \frac{l + 12}{60 \times T}\right) = \text{Working pressure, in lbs. per square inch.}$$

T = Thickness of plate, in inches.

$l$ = Length between centre of flanges, in inches.

D = Outside diameter of furnace, in inches.

The radii of the flanges on the fire side should be about $1\frac{1}{2}$ inches. The depth of the flanges from the fire side should be three times the diameter of the rivet *plus* $1\frac{1}{2}$ inches, and the thickness of the flanges should be as near the thickness of the body of the plate as practicable. The distance from the edge of the rivet holes to the edge of the flange should not be less than the diameter of the rivet, and the diameter of the rivets at least $\frac{3}{8}$ inch greater than the thickness of the plate. The depth of the ring between the flanges should be not less than three times the diameter of the rivets, the fire edge of the ring should be at about the termination of the curve of flange, and the thickness not less than half the thickness of the furnace plate. Turned rings are such as may be considered a first class method of construction.

The holes in the flanges and rings should be drilled in place if practicable, but if not drilled in place they should be drilled sufficiently small, and afterwards when in place rimered out until the holes are quite fair, the holes should be slightly tapered and the heads of the rivets of moderate size.

After all welding, and after all flanging and heating, each ring should be efficiently annealed in one operation.

(ii) In furnaces of similar construction to the above, when the dimensions as to depth of flanges and size of rivets are less than those there enumerated, then the formula to be used will be:

$$\frac{10{,}000 \times T}{D} = \text{Working pressure, in lbs. per square inch,}$$

provided that the depth of the flanges from the fire side is not less than three times the diameter of the rivet *plus* $1\frac{1}{8}$ inches, and the diameter of the rivet at least $\frac{1}{4}$ inch greater than the thickness of the furnace plate.

(*b*) *Steel Work.*

In place of 9,000 and 10,000 above use, the values 9,900 and 11,000, *i.e.*, 10 per cent. in excess of iron strength, provided the quality of the steel complies with the conditions prescribed for furnace plates [see rule 35 (*b*)].

120. *Corrugated furnaces.*

(*a*) *Iron Work.*

The working pressure for corrugated furnaces practically circular and machine-made, provided the plane parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{5}{16}$ inch thick should not be greater than found by the following formula:

$$\frac{10{,}000 \times \text{thickness in inches}}{\text{Mean diameter in inches}} = \text{Working pressure, in lbs. per square inch.}$$

(*b*) *Steel Work.*

Provided the quality of the steel complies with the conditions prescribed for furnace plates [see rule 35 (*b*)], when steel furnaces are machine-made by Messrs. The Leeds Forge Company, of the Fox corrugated and Morison suspension types, or by Messrs. John Brown and Company, Sheffield, of the Purves ribbed and grooved type, if they are practically true circles, and the plates not less than $\frac{5}{16}$ inch thick, the working pressure is found by the following formula:

$$\frac{C \times T}{D} = \text{Working pressure, in lbs. per square inch.}$$

C = 14,000.

T = Thickness, in inches.

D = Outside diameter, in inches, measured at the bottom of the corrugations when the furnace is of the corrugated or suspension type, or over the plain parts when it is of the ribbed and grooved description.

In Fox's corrugated furnaces the pitch of the corrugations and the length of the plain parts at the ends should not exceed 6 inches, and in Morison's suspension furnaces the pitch should not exceed 8 inches, and the length at the ends 5 inches. In both descriptions of furnaces the depth from top of corrugations outside to bottom of corrugations inside should not be less than 2 inches, and the plates at the ends should not be unduly thinned in the flanging.

The plates of ribbed and grooved furnaces should be formed by rolling, the ribs should not be less than 1 $\frac{5}{16}$ inches above the plain parts, and the depth of the grooves not more than $\frac{3}{4}$ inch, the length between the centres of the ribs not over 9 inches and that of the plain parts at the ends not over 6 inches, and the ends rolled slightly thicker than the plain parts, and not reduced at any part by flanging, &c., below the thickness of the body of the furnace.

If the furnace is riveted in two or more lengths the case should be submitted to the Senior Inspector for consideration.

I.—ORDINARY CHAIN AND ZIGZAG RIVETED JOINTS.

$$\frac{100\,(p-d)}{p}=r.$$

$$\frac{100 \times S^1 \times d^2 \times \cdot 7854 \times n \times C \times F}{S \times p \times T \times F^1}=R.$$

Given C, $d$ F, $F^1$, $n$, T, to find $p$, so that $r$ and R are equal

$$\frac{S^1 \times F \times d^2 \times \cdot 7854 \times n \times C}{S \times F^1 \times T}+d=p.$$

Given C, F, $F^1$, $n$, T, $r$, to find $p$ and $d$.

$$\frac{S \times F^1 \times r \times T}{S^1 \times F \times (100-r) \times \cdot 7854 \times n \times C}=d.$$

$$\frac{S \times F^1 \times 100 \times r \times T}{S^1 \times F\,(100-r)^2 \times \cdot 7854 \times n \times C}=p.$$

When $d$ is found first, then:

$$\frac{100\,d}{100-r}=p.$$

*Butt Straps.*

Iron plates and iron butt straps or steel plates and steel butt straps:

Double butt straps:

$$\frac{5 \times T}{8}=T^1.$$

Single butt straps:

$$\frac{9 \times T}{8}=T^1.$$

*For distance between Rows or Rivets, &c.*

Iron and steel:

$$\frac{3 \times d}{2}=E.$$

Chain riveted joints, Figs. 2, 4, 6, 9, 11, not less than:

$$2 \times d=V.$$

*See note 1 at the end.*

Zigzag riveted joints, Figs. 3, 5, 7, 10, 12,

$$\frac{\sqrt{(11\,p+4d)\,(p+4d)}}{10}=V.$$

Diagonal pitch, Figs. 3, 5, 7, 10, 12:

$$\frac{6p+4d}{10}=p^d.$$

II.—CHAIN AND ZIGZAG RIVETED JOINTS IN WHICH EVERY ALTERNATE RIVET HAS BEEN OMITTED IN THE OUTER ROW, OR IN THE OUTER AND THE INNER ROWS, SUCH AS ARE SHOWN IN THE FOLLOWING SKETCHES:—

$$\frac{100\,(p-d)}{p}=r.$$

$$\frac{F \times S^1 \times 100 \times d^2 \times \cdot 7854 \times n \times C}{F^1 \times S \times p \times T}=R.$$

$$\frac{100\,(p-2d)}{p}+\frac{R}{n}=R^1.$$

*Butt Straps.*

Where the number of rivets in the inner row is, double the number in the outer row.

Iron plates and iron butt straps or steel plates and steel butt straps.

Double butt straps;

$$\frac{5 \times T\,(p-d)}{8 \times (p-2d)}=T^1.$$

Single butt straps:

$$\frac{9 \times T\,(p-d)}{8 \times (p-2d)}=T^1.$$

When the number of rivets in the inner row is the same as in the outer row.

Zigzag riveted joints, Figs. 17, 18, 19, 20:

$$\frac{\text{R. T. No. 4882 A/01}}{\sqrt{(\frac{11}{20}p + d)(\frac{1}{20}p + d)}} = V.$$

$$\frac{3p + 4d}{10} = P_{D}.$$

## III.—Maximum Pitches for Riveted Joints.

T = Thickness of plate, in inches.

$p$ = Maximum pitch of rivets, in inches, provided it does not exceed 10 inches.

C = Constant, applicable from the following table:—

| Number of Rivets in one Pitch. | Constant for Lap Joints. | Constants for Double Butt Strap Joints. |
|---|---|---|
| 1 | 1·31 | 1·75 |
| 2 | 2·62 | 3·50 |
| 3 | 3·47 | 4·63 |
| 4 | 4·14 | 5·52 |
| 5 | ... | 6·00 |

$$(C \times T) + 1\tfrac{5}{8} = p.$$

When the work is first class, such pitches may be adopted so far as safety is concerned, yet in some cases it may be well not to adopt the greatest pitch found by the formulæ. The maximum pitch should *not*, however, exceed 10 inches with the thickest plates for boiler shells. If in any case the pitch is found to exceed that arrived at by the foregoing formulæ, for the particular description of joint and thickness of plate, such pitches should *not* be passed, but in all cases reported to the Senior Inspector.

Note 1.—The minimum value of V or $V^1$ for chain riveted joints is given as $2d$, but $\frac{4d + 1}{2}$ is more desirable.

*N. B.*—When the rivet holes are *punched*, the factor of safety will be affected as instructed in table to Rule 28 and the above formulæ for *drilled holes* then applied.

## IV.—To determine the Working Pressure.

$$\frac{S \times \% \times 2T}{F \times D} = B.$$

*Instructions as to Keeping the Book.*

The serial number is to run for the calendar year, but in the case of still-born children no serial number is to be entered. If the child has died at the date of reporting its birth, or before being vaccinated, the date of death is to be written across below columns 8, 9, 10, and an entry made referring to the number in the Death Register.

At the close of every month columns 6 and 7 to be totalled up, still-borns being counted separately, and a line to be drawn across and a fresh page commenced.

The Registrar shall, on registering a birth, give to the person reporting certificates in the forms of Schedules A, B, C and D of the Act, as required by the Act, filling in the full details in a certificate according to the form of Schedule D of the Act, and putting in the number corresponding with the serial number in the Birth Register, and explain the purport of the certificate.

The Registrar shall, on receipt of the necessary information from the Public Vaccinator, fill in the proper columns in his Birth Register—Vaccination Book I.

The Registrar shall submit on the first of every month to the Superintendent of Vaccination a list of unprotected infants over 12 months of age, *viz.*, those infants registered as born in the corresponding month of the previous year about whom no information has been received.

He shall also keep a register of postponed vaccinations according to the form of Schedule E as laid down in Section 20 of the Act.

The Public Vaccinator shall be at liberty to inspect these Registers at any reasonable time and take extracts from them.

*Rules framed under Section 32 (c) of Act I of 1892.*

The whole of the Lárkána Municipal area is constituted a Circle for the performance of vaccination.

The Inspector of Sanitation and Vaccination of the Shikárpur Zilla for the time being shall be Superintendent of Vaccination of the Lárkhána Circle.

The name of the Public Vaccinator, for the Lárkhána Circle is to be published in the *Bombay Government Gazette* and in the *Sind Official Gazette*. The Public Vaccinator shall have a certificate of qualification signed by the Sanitary Commissioner in the form marked F and G to these rules annexed, and the Deputy Sanitary Commissioner, Sind Registration District, is authorized to appoint a Deputy, for a Public Vaccinator, when necessary; provided the Deputy also holds a certificate of qualification as a Public Vaccinator signed by the Sanitary Commissioner.

The Public Vaccinator for the Lárkhána Circle shall reside within his Vaccination Circle and shall have his name, with the addition of "Public Vaccinator for the Vaccination Circle of Lárkhána," both in English and Vernacular, posted on a board outside his dwelling.

There shall be two Public Vaccine Stations: Station I at the Municipa Dispensary; Station II at the Municipal Night School.

At both these Stations the name of the Public Vaccinator, with his designation and the days and hours of his attendance, shall be conspicuously posted.

The days and hours of attendance of the Public Vaccinator shall be—

At No. I Station— on Mondays in each week, between the hours of 8 and 12 A. M. (Madras).

At No. II Station—on Wednesdays in each week, between the hours of 8 and 12 A. M. (Madras).

The Public Vaccinator shall keep a Vaccination Register in the following form (Vaccination Book II) and shall enter therein the names of all persons/children primarly vaccinated by him and the result of the operation and the date of giving a certificate in the form of Schedules (B) or (C) of the Act as the case may be. No names to be entered in this Register unless a vaccination operation has been performed. The serial numbers are to be continued for the official year.

At the end of every month a line to be drawn across the page, and the columns 1, 7, 8, 10, 11 totalled up, and a copy of the Register for the month is to be sent to the Superintendent of Vaccination for transmission to the Deputy Sanitary Commissioner, Sind Registration District.

If the $\frac{\text{person}}{\text{child}}$ is unfit for vaccination, the Vaccinator shall sign and give a certificate in the form of Schedule A of the Act, explaining that the operation is postponed for two months. He shall send a copy of certificate A to the Registrar and keep a register (the same form as "postponed Vaccination Register") of such postponed vaccinations to compare with Schedule E kept by the Registrar.

If the $\frac{\text{person}}{\text{child}}$ has had small-pox, the Vaccinator shall sign and deliver a certificate in the form of Schedule B[2] hereto annexed, sending also a copy to the Registrar.

[b] *Notn. No. 2585, Educational, dated 6th December 1894, B. G. G., 1894, Pt. I, p. 1233.*

In supersession of the rules published by Government Notification No. 129, dated 26th January 1887, and with reference to Government Notification No. 2433, dated 6th November 1893, the following rules made in exercise of the powers conferred under Section 24 of the Bombay District Municipal Act, 1873, as amended by Section 49 (*e*) of the Bombay District Municipal Act Amendment Act, 1884, to prescribe the extent of the independent authority of Municipalities in respect of public education, and the relations of Municipalities with the Government Educational Department, are published for general information:—

*Rules laid down by Government under Section 24 of the Bombay District Municipal Act of 1873.*

1. The powers and duties of every Municipality in respect of the establishment and maintenance of schools may, subject to the reservations and conditions hereinafter contained, and subject to such alterations as may from time to time be made under the authority of Government on this behalf, be delegated to a Committee, which shall be called "the Schools Committee",

---

[a] See foot-note [a] on page 859, *supra*.

[b] This Notification, issued under Bombay Act VI of 1873, as amended by Bombay Act II of 1884, is kept in force by Bombay Act III of 1901, Section 2 (*1*) (*b*).

and shall be constituted according to the rules made under Section 32 of the District Municipal Act Amendment Act (Bombay II of 1884).

2. The principles and system of school management, the course of instruction to be followed, and the rates of salary to be given to the various grades of masters in Municipal Schools, shall be those prescribed by the Educational Department under the authority of Government in the Codes for Vernacular Masters and Training Colleges, and in Chapter I and Schedules of the Grant-in-aid Code, so far as the same may be applicable: provided that to meet local requirements, with the previous consent of the Director of Public Instruction, any Municipality may adopt such modifications as may be found to be necessary or expedient. In case of doubt as to the application of any principle or rule the decision of the Director of Public Instruction shall be followed subject to an appeal to Government, whose decision shall be final and conclusive.

3. Municipal Schools shall, subject to the proviso in Rule 2, be provided for all castes and classes of the community, and shall be open to inspection and examination at all times by the Government Inspecting Staff. The Municipality shall in each case make suitable arrangements in communication with the Inspector for the annual examination required by the Educational Department.

4. In the Budegt Estimate of every Municipality prepared under Section 88 of the Bombay District Municipal Act of 1873, as amended by clause (*j*) of Section 49 of the Bombay District Municipal Act Amendment Act, 1884, there shall be a separate section for educational income and expenditure. A copy of that section, with full details of both income and expenditure, and of all variations and alterations made from time to time shall be forwarded to the Educational Inspector as soon as conveniently may be after the general meeting at which such Budget Estimate, variation or alteration is passed. The School Fund shall be kept distinct from the general Municipal Fund and in the annual accounts rendered under Section 90 of the said Act, there shall also be a separate section under the head Education. A copy of this section shall be forwarded yearly to the Government Educational Inspector of the Division as soon as possible after the accounts have been audited and passed.

5. In the Budget Estimate and in the annual accounts shall be set forth in separate parts the receipts and expenditure:—

(1) for schools within the contract *;

(2) for schools not within the contract, but maintained or aided from the Municipal Fund with or without a Government grant;

(3) for any other educational purposes not included in the above, but coming under Section 24, clauses (15), (16) or (21) of Act VI of 1873.

Under the head of 'Receipts' shall be shown separately—

(*a*) balance of School Fund unexpended and carried forward;

(*b*) the Government contract grant;

(*c*) the fee receipts of schools;

* The contract grant is a sum of money paid at the discretion of Government for the support of a certain number of primary schools said to be within the contract.

(*d*) the sum assigned and paid to the Municipality under Section 47 of the Bombay District Local Boards Act, 1884, which is to be expended on educational purposes under the second paragraph of that section;

(*e*) any other contribution made by Government or by a Local Board, and any other income received by the Municipality for expenditure on or for the benefit of the said schools, or accruing from the said schools;

(*f*) the allotment made by the Municipality in the year of account from receipts of the Municipal Fund other than receipts under (*a*), (*b*), (*c*), (*d*), and (*e*) for expenditure on or for the benefit of the said schools.

6. The Budget Estimate and annual accounts shall be rendered in such detail as may be set forth in forms prescribed from time to time by the Governor in Council.

7. In all questions relating to pension, leave, and pay, and acting allowances the rules from time to time in force for the Government uncovenanted services shall be applicable to every member of a school establishment, who has been or may be transferred from the Educational Department, and who was permanently employed by that Department on a salary of more than Rs. 10.

In Municipal Schools so long as persons who hold certificates recognised by the Educational Department or who are already in receipt of pensionable salaries under Government are procurable, no persons not so qualified shall be employed on a salary of more than Rs. 10. It shall be incumbent on every Municipality engaging a teacher as aforesaid to make provision for his pensionary rights and leave allowances, in accordance with the rules in this behalf from time to time prescribed by Government, and every such teacher shall have the same rights in respect of pension, leave allowances, dismissal and transfer as if he were an officer lent to the Municipality. In filling up places of non-pensionable pay, the Municipality shall give the preference to those who have passed an examination qualifying for the Public Service, or who have been useful teachers.

*Explanation.*—In reference to the obligation as to the employment of certificated persons recited in this rule, it must be understood that all teachers on a salary of more than Rs. 10, whether first employed by the Educational Department in Government and Local Board Schools or whether first employed by the Municipalities in their primary and industrial schools, are interchangeable. The Municipalities must, therefore, limit their choice of new teachers to (1) Teachers who hold certificates issued by a *Training Institution and signed by an Educational Inspector and (2) Teachers who hold a Drawing Master's Certificate from the Jamsetji Jijibhai School of Art or a final certificate for any course taught in the College of Science, the Dayárám Jethmal Sind College, the Jamsetji Jijibhai School of Art, or the Victoria Jubilee Technical Institute.

*A Municipality can send candidates to the Government Training Colleges provided (1) the candidates are accepted as properly qualified by the Educational Inspector and the Educational Inspector has room for them, and (2) the Municipality provides the usual stipend, and engages to employ the candidates for five years after passing for a certificate.

8. Subject to Rule 7, the appointment, promotion, punishment, suspension and dismissal of all members of the establishments of Municipal

Schools shall rest with the Municipality or the Schools Committee to whom such power may be delegated: provided that no officer in receipt of a salary exceeding ten rupees per month shall be dismissed or have his salary permanently reduced or be retransferred to the Educational Department without the previous sanction of the Municipality.

9. In order that the less advanced Municipalities may be relieved of responsibilities which they are not yet prepared to bear, any such Municipality may apply to the Director of Public Instruction, and on such application the administration of its schools in the matter of appointment, promotion, punishment, suspension and dismissal of all members of the establishments of Municipal Schools may be conducted by the Government Educational Department.

10. The scale of school fees payable in any Municipal School shall not, without the previous consent of the [a] Educational Inspector [a] be increased above, or reduced below, that existing at the time of the transfer of such school to the Municipality. Free-studentships in primary or secondary schools maintained or aided by a Municipality shall be distributed according to the rule prescribed in the Vernacular Masters' Code, and scholarships paid from Municipal Funds shall be allotted on the same principle. But it shall be allowable to consider all the schools of the same class (primary or secondary) together, and if suitable claimants do not come forward the allotted places shall remain vacant.

11. As to all Departmental matters other than those referred to in Rule 2 as to which the ruling of the Educational Department is obligatory, every Municipality shall give full consideration to the representations of the Educational Department and shall make a written reply within a reasonable time stating its reasons in case it dissents from the views set forth in such representations.

12. With a view to the promotion of private schools and as an aid to the provision of the adequate system of primary instruction which is required by law, every Municipality shall keep a register of primary schools not included in the contract as Municipal Schools, to be recommended by them from time to time for maintenance under the Grant-in-aid system according to the Code of rules from time to time prescribed and published by Government: provided that a Municipality shall not interfere in any way with such schools as do not desire to receive aid or to be subject to its supervision.

13. A detailed statement of all employés in Municipal Schools, with their salaries and all other items of recurring expenditure, shall be maintained by each Municipality and shall be at all times open to the inspection of the Government Educational Inspector.

14. Every Municipality shall furnish without delay all returns, statistics and any other information relating to municipal Schools which may be called for by the Educational Inspector.
